

Gemtek SHOWCASE AT 2018 MWC

Gemtek is holding a Four-day event for the public to see our newly launched products. In this event, Gemtek would like to show you our LTE solution, including the world's first Cat12 LTE CPE. What's more, we are delighted to show our newest products and technologies: X-cell system and smart home solution. The event intends to demonstrate the concepts that we have been improving our expertise in RF technology and strengthening experiences in Telco and IoT businesses. We will have live demo for you to experience the technology with us.

Our primary responsibility is to continually offer high quality and functionality as well as customer oriented solutions. If your company is looking for a one stop solution provider, look no further - You've found the right partner. We are showing our warm welcome to see you, witnessing our growth in the fields of LTE, IoT and cloud service.
