I. Letter to Shareholders

Dear Shareholders,

I. Foreword

Reflecting on 2022, the gradual end of the Covid-19 pandemic resulted in the reopening of borders, allowing for the resumption of business and daily activities, marking the beginning of the first stage of global recovery. Hence, we hereby congratulate all shareholders for successfully overcoming this difficult period. In the post-pandemic era, we adapted to a new way of life and worked to maintain the steady operation of our daily routines. However, the continuously evolving virus and the ongoing political turmoil resulting from the Russo-Ukrainian War have continued to present major challenges worldwide, testing the resilience of businesses and governments alike. Inspite of these setbacks, Gemtek Technology remained steadfast in adapting and solidifying our operational strategies while expanding our business capabilities. Our establishment of an efficient SMT line in our Vietnam factory was a testament to our success in staying ahead of the game. 2022 was a challenging year for Gemtek, but despite the severity of the overall environment, we continued to strive for progress in technology and operations, achieving a peak in revenue.

In the midst of global recovery, however, many businesses worldwide are still struggling in the aftermath of the pandemic. Despite the balance of supply and demand for electronic components gradually rebounding, policies implemented by governments around the world during the pandemic have had adverse consequences on factory operations. In the first half of the year, not only were the Gemtek Electronics (Kunshan) production lines in Mainland China suspended for a month, but suppliers in China also faced production stoppages, leading to a ripple effect on the supply of components. Additionally, a large-scale outbreak of confirmed cases at the Vietnamese factory just so happened to occur during the same timeframe, which overally cast a looming shadow over the revenue performance of Gemtek Technology at the beginning of the year. These uncontrollable factors posed a severe challenge to Gemtek, but with the efforts of our Chairman, General Manager, and colleagues, we managed to weather the storm and ride the wave with success. The pandemic provided an unforeseen opportunity for Gemtek Technology to learn and adjust our operational structure, including our procurement strategies, product design, coordination, and collaboration with customers. We made dynamic adjustments in these areas and put them into practice for the future. Throughout our journey, we have always upheld the principle of serving our customers first, with the hope of reducing the impact of structural factors on our company and customers in the future.

Looking ahead to 2023, it is widely agreed that "digital technology" will continue to be a driving force behind technological development. In addition, in the post-pandemic era, we also need to be aware of other contemporary threats such as population ageing and climate change, which are the major contributors to the decline in economic productivity and environmental degradation around the world. Furthermore, geopolitical turbulence and the US-China competition have added momentum to the deglobalization trend and have led to a rise in calls for regional protectionism and industry localization. All these factors combined indicate that a substantial change in the current supply chain structure is unavoidable. Essentially, digital technology is the key to propelling industry transformation. Digital technology encompasses a variety of fields, such as Artificial Intelligence, Edge Computing, Internet of Things, Cybersecurity, and more. The internet serves as the cornerstone that enables these technologies to function, and as such, the deployment of network communication equipment is crucial. Our research and development team is continuously improving their skills to make help make a difference in the advancement of digital technology. In 2023, Gemtek Technology will continue to provide hardware manufacturing and design services to our customers, while also investing more resources in integrating software and hardware on SOC, user platforms, and application services. Our objective is to offer a broader spectrum of services, such as IoT and cybersecurity, to assist our end customers manage their business models more flexibly, which will ultimately lead to increased profitability. Gemtek will continue to optimize its research and development strategy to provide customers with the best possible products and services.

Despite the global pandemic and inflationary pressure brought on by the Russo-Ukrainian War, the demand for rapid deployment of broadband infrastructure equipment never wavered. Governments around the world are still eager to implement their plans to build fiber optic networks, and the deployment of 5G networks is also proceeding in full swing as customer demand remains strong. According to the 2022 Ericsson Mobility Report, despite a weaker economy and geopolitical uncertainties, service providers continue to deploy 5G. As of November 2022, 228 service providers have already launched commercial 5G services globally. Deployment of 5G standalone (SA) networks also continues, with around 35 service providers having deployed or launched 5G SA in public networks. Ericsson predicts that the 5G subscription uptake will be faster than that of 4G following its launch in 2009, with 5G expected to reach 1 billion subscriptions 2 years sooner than 4G. It is expected that by the end of 2028, the number of 5G subscribers will reach approximately 9.2 billion.

The number of smartphone users will continue to grow as well, and it is expected to reach 6.6 billion by the end of 2022, accounting for 79% of all mobile phone users. By 2028, this

number is predicted to increase to 7.8 billion, accounting for 84% of all mobile users. The demand for mobile networks will continue to strengthen, and it is predicted that FWA (Fixed Wireless Access) will grow at a strong rate of 19% per year by 2028. Furthermore, the deployment of fiber optic fixed broadband is a critical infrastructure project for many governments. As for wireless networks, plans for the operation of low-orbit satellites and the deployment of necessary infrastructure are also underway. The integration of diverse networks will continuously enhance the quality and convenience of human communication in the future.

In addition to keeping pace with technological developments, Gemtek has incorporated "Net Zero" as part of our new policies. As a world-class network communications company, we believe it is our responsibility to take care of the environment. Our R&D and management teams have always played a major role in advancing technology. In recent years, we have also made a conscious effort to prioritize sustainability by carefully selecting environmentally friendly components, processes, and packaging. As a result, sustainability has become one of our company's strengths.

Although inflation has affected the overall economy in 2023, Gemtek remains committed to its original goal of providing "Wireless Broadband Anywhere", and is fully prepared to expand its production scale and capabilities despite the economic fluctuations. Furthermore, Gemtek plans to allocate more resources to research and design of software and hardware, with the aim of meeting the expectations of our customers and shareholders. We sincerely hope that all shareholders will continue to support us in the future, and join hands with Gemtek Technology to create a better future together.

II. 2022 Business Report

(I) Business Results

In 2022, the total consolidated operating income was NT\$27,899,990 thousand. The combined operating costs and operating expenses was NT\$27,171,633 thousand. The consolidated non-operating income was NT\$273,333 thousand. The consolidated non-operating expenses was NT\$82,357 thousand. The pre-tax net profit was NT\$919,333 thousand; income tax expense was NT\$173,283 thousand. Therefore, the consolidated net profit after tax for this year is NT\$746,050 thousand. Earnings per share (after tax) is NT\$1.70.

(II) Financial Status and Profitability

The Company has always adhered to the conservatism principle in its financial operations, laying out timely plans for the use of long and short-term funds. In 2022, the current ratio was 136.27% and the debt ratio was 46.12%, indicating that the composition of the company's financial structure was adequately sound and stable.

(III) Research and Development

2022 R&D Achievements

- (1) Development of next-generation passive optical network/ ultra-wideband network and voice service integration systems GPON/XGSPON /10GEPON/DPoE/NGPON2 products and shared software platform. (High performace xPON integration platform development based on protoble openwrt)
- (2) Fixed broadband xDSL and G.FAST Ultra-wideband product development
- (3) Whole home WiFi with Easy Mesh development
- (4) Advanced WiFi 6/6e AP, Repeater, and Mesh development
- (5) Enterprise-grade WiFi platform development
- (6) WiFi 7 AP prototype development
- (7) Cost-effective and Advanced LTE client device development, including Cat 20, Cat 12, Cat6, Cat4, CBRS
- (8) 3GPP based CIOT client device and LGA module development (including Cat 1, Cat-M1, NB-IOT)
- (9) Cost effective 5G NR FR1 IDU/ODU CPE development
- (10) Easy installtion and cost effective 5G NR FR1+ FR2 ODU CPE development

- (11) 28/39G mmwave smart antenna phase array system platform development
- (12) 5G NR smallcell and core network platform development
- (13) Cost effective 5G NR smallcell development for sharedband CBRS
- (14) Scalable Phased Array Antenna Development for LEO application ka/ku-band

III. 2022 Business Policies

- (I) Marketing Strategy
 - (1) Strengthen existing customer relationships and develop new customers.
 - (2) Launch new products according to market trends with new technical specifications.
 - (3) Identify market demands and strengthen the ability to collect market information.
 - (4) Satisfy market demands and expand business operations in emerging markets.
 - (5) Build good rapport with new clients and seek new business opportunities.
- (II) Production Policy
 - (1) Strictly control the production process and increase the utilization rate of production capacity.
 - (2) Strictly select suppliers that meet cost effectiveness and integrate resources to pursue profitability.
 - (3) Track the lead time and quality of key manufacturing components. Keenly identify changes in supply, demand and prices.
 - (4) Adjust capital expenditures based on the condition of the industry.
 - (5) Introduce automated and optimized production systems to increase production efficiency.
 - (6) Achieve Net Zero by incorporating Post-consumer recycled plastic (PCR) materials into our product design.
- (III) Industrial Development

Gemtek has long been dedicated to the development of wireless communications technology. Business development is centered on the following major operations:

- (1) Wireless network service products, which include broadband network related equipments that are built on top of telecommunications infrastructures (5G related technologies, LTE Small Cell, CPE), telecommunication network products (Wi-Fi AP/Router) and business-grade wireless AP/routers and Wi-Fi modules etc.
- (2) Fixed Broadband Network connection related products, which includes telecommunication integration (XPON, VoIP, VDSL, G.fast, Setup Box etc.) and

fiber-optic network products.

- (3) Telecommication modules and services.
- (4) Cloud software integration services, IoT products.

IV. The Impacts of External Business Environment, Regulatory Environment, and Macroeconomics

(I) External Business Environment

Inter-industry competition will make business and R&D more challenging in terms of whether prices and product innovation can meet the overall market trends and customer demands.

(II) Regulatory Environment

China continues to formulate new laws and regulations to regulate Taiwanese businessmen, resulting in a continuous increase in cost for conducting business operations in the Mainland. Furthermore, the Sino-US trade war is driving tariffs to potentially go higher.

(III) Macroeconomics

A network of industries, infrastructures, and consumers are in high demand of advanced telecommunication products due to the rapid development of wired and wireless broadbands technologies such as optical fiber and 5G. In addition, the new generation of WiFi standards also facilitates the production of more diversified cross-domain applications, which may benefit our overall business operations in the future.

V. Conclusion

The company's management team would like to express their sincere gratitude to all shareholders for their unwavering support. We look forward to your continued encouragement and guidance in the forthcoming years.

Chairman

Hong-wen Chen

II. Company Profile

I. Date of Establishment: June 29, 1988

II. Company History and Milestones

| Year/Month | Key Historical Events |
|------------|---|
| 1988/06 | Gemtek Co., Ltd. was founded in Hsinchu City, Taiwan with an initial paid-in capital of NT\$2 million. Business operations mainly centered on data processing, typesetting, software, hardware, peripheral equipment, and the buying and selling of office machines. |
| 1992/05 | Gemtek Co., Ltd. changed its name to Gemtek Technologies Co., Ltd., and relocated its headquarters to Taipei City. Paid-in capital increased to NT\$8 million. Expanded new business operations in research and the buying and selling of electronic components, semi-finished products, and finished products. |
| 1994/10 | The company decided to narrow its business scope onto the development of wireless communication products, focusing mainly on the research and development of key RF wireless communication technology and components. |
| 1994/12 | Capital increased by NT\$12 million by issuance of common stock for cash. Paid-in capital increased to NT\$20 million. The company relocated its business address to Xizhi Town, Taipei County. |
| 1996/09 | Capital increased by NT\$10 million by issuance of common stock for cash. Paid-in capital increased to NT\$30 million. 1997/09 Capital increased by NT\$25 million by issuance of common stock for cash. Paid-in capital increased to NT\$55 million. |
| 1997/12 | Transfer of equity shares by significant shareholders to include corporate shareholders. Capital increased by NT\$90.5 million by issuance of common stock for cash. Paid-in capital increased to NT\$150 million. Established first RF production line. Holds advanced mass production technology for RF products. |
| 1998/01 | 2.4GHz-WLAN PCMCIA Wireless LAN reached satisfactory completion based on R&D milestones, entering trial production phase. |
| 1998/08 | Acquired land in Hsinchu Industrial Park to start first phase construction of the company's manufacturing plant. |
| 1999/03 | Capital increased by NT\$45 million by issuance of common stock for cash. Paid-in capital increased to NT\$195 million. 2.4GHz-2Mbps ISA Wireless LAN reached satisfactory completion based on R&D milestones, entering mass production phase. |
| 1999/06 | Public offering of shares was completed. Construction of new plant was completed. Gemtek aims to become a world leading company that specializes in the research and development, design, and manufacturing of RF wireless communication products. |
| 1999/08 | Obtained ISO-9001 certification from German TÜV. |
| 1999/11 | Capital increased by NT\$55 million by issuance of common stock for cash. Paid-in capital increased to NT\$250 million. Zhan-Yi Investment Co., Ltd. transferred shares to MiTAC Group. An election event was held to re-elect directors and supervisors. Mr. Feng-Zhe Tsai, representative of MiTAC International Corporation, was elected chairman of Gemtek Technology Co., Ltd. |
| 2000/03 | 2.4GHz-11Mbps W-LAN Card and AP reached satisfactory completion based on R&D milestones. Conducted successful trial production run. |
| 2000/05 | Capital increased by NT\$50 million by issuance of common stock for cash. Paid-in capital increased to NT\$300 million. |
| 2000/08 | Capital increased by NT\$100 million by issuance of common stock for cash. Paid-in capital increased to NT\$400 million. |
| 2000/09 | Received a research grant from the Industrial Development Bureau of the Ministry of Economic Affairs. Launched project to research and develop 5GHz Wireless LAN. |

| Year/Month | Key Historical Events |
|------------|--|
| 2001/07 | Expanded factory to increase production capacity. |
| 2002/01 | Company listed in GreTai Securities Market. Securities traded over-the-counter. |
| 2002/07 | Capitalization of earnings and commission paid to employees increased cash by NT\$233.7 million. Capital increased by NT\$100 million by issuance of common stock for cash. Paid-in capital increased to NT\$733.75 million. |
| 2003/03 | 1st issuance of convertible bonds totaling NT\$120 million. 1st issuance of employee stock option certificates totaling NT\$15 million. |
| 2003/06 | Transferred stock exchange listing from OTC market to Taiwan Stock Exchange market. |
| 2003/08 | Capitalization of earnings increased cash by NT\$146.75 million. Capitalization of commission paid to employees increased cash by NT\$27 million. Paid-in capital increased to NT\$907 million. |
| 2003/12 | Purchased new land in Hsinchu Hukou Industrial Park. Set new arrangements to expand factory and establish R&D center. |
| 2004/10 | 2nd issuance of employee stock option certificates totaling NT\$30 million. |
| 2004/03 | 1st conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds totaling NT\$38,191,510, becomes effective. Paid-in capital increased to NT\$945,691,510. |
| 2004/04 | 2nd conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds totaling NT\$14,444,430, becomes effective. Paid-in capital increased to NT\$960,135,940. |
| 2004/05 | Resolution approved by the 2004 Annual General Shareholders Meeting becomes effective to re-elect company's board of directors and supervisors upon expiration of the term of their duties, and to add 8 seats to the company's board of directors. |
| 2004/08 | Capitalization of earnings increased cash by NT\$192,027,190. Capitalization of commission paid to employees increased cash by NT\$35,740,000. 3rd conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds, totaling NT\$47,362,890, becomes effective. Paid-in capital increased to NT\$1,235,266,020. |
| 2004/10 | 4th conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds, totaling NT\$41,675,820, becomes effective. Paid-in capital increased to NT\$1,276,941,840. |
| 2005/01 | 5th conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds, totaling NT\$24,804,700, becomes effective. Paid-in capital increased to NT\$1,301,746,540. |
| 2005/04 | 6th conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds, totaling NT\$45,459,010, becomes effective. Paid-in capital increased to NT\$1,347,205,550. |
| 2005/05 | Capital increased by NT\$200 million by issuance of common stock for cash. Paid-in capital increased to NT\$1,547,205,550. |
| 2005/08 | Capitalization of earnings increased cash by NT\$243,531,730. Capitalization of commission paid to employees increased cash by NT\$44,270,000. Paid-in capital increased to NT\$1,835,007,280. |
| 2006/03 | Capital increased by NT\$13,199,000 by issuance of common stock for cash due to acquisition of Antek Networks Inc. 7th conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds, totaling NT\$2,618,360, becomes effective. Paid-in capital increased to NT\$1,850,824,640. |
| 2006/06 | 8th conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds, totaling NT\$1,221,900, becomes effective. Paid-in capital increased to NT\$1,852,046,540. |
| 2006/07 | 1st issuance of overseas convertible bonds with a USD50 million cap. |

| Year/Month | Key Historical Events |
|------------|---|
| 2006/10 | Capitalization of earnings increased cash by NT\$185,134,830. Capitalization of commission paid to employees increased cash by NT\$45,000,000. 9th conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds totaling NT\$6,034,820, become effective. Paid-in capital increased to NT\$2,088,216,190. |
| 2007/01 | 10th conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds, plus 1st conversion of bonds to common shares based upon the 2006 1st issuance of overseas convertible bonds totaling NT\$49,141,270, become effective. Paid-in capital increased to NT\$2,137,357,460. |
| 2007/04 | 11th conversion of bonds to common shares based upon the 2003 1st issuance of convertible bonds, plus 2nd conversion of bonds to common shares based upon the 2006 1st issuance of overseas convertible bonds totaling NT\$104,668,400, become effective. Paid-in capital increased to NT\$2,242,025,860. |
| 2007/06 | Resolution approved by the 2007 Annual General Shareholders Meeting becomes effective to re-elect company's board of directors (9 seats, including 2 independent directors) and supervisors (3 seats) upon expiration of the term of their duties. |
| 2007/10 | Capitalization of earnings increased cash by NT\$110,598,790. Capitalization of commission paid to employees increased cash by NT\$50,180,000. 3rd conversion of bonds to common shares based upon the 2006 1st issuance of overseas convertible bonds totaling NT\$9,046,620, becomes effective. Paid-in capital increased to NT\$2,411,851,270. |
| 2008/04 | 2nd issuance of convertible bonds totaling NT\$1 billion. Conversion of 1st issuance of employee stock option certificates to common shares totaling NT\$3,030,000, becomes effective. Paid-in capital increased to NT\$2,414,881,270. |
| 2008/09 | Capitalization of earnings increased cash by NT\$44,097,620. Capitalization of commission paid to employees increased cash by NT\$72,150,000. Conversion of 1st issuance of employee stock option certificates to common shares totaling NT\$4,300,000, becomes effective. Paid-in capital increased to NT\$2,535,428,890. |
| 2008/11 | 4th conversion of bonds to common shares based upon the 2006 1st issuance of overseas convertible bonds totaling NT\$47,853,050, conversion of 1st issuance of employee stock option certificates to common shares totaling NT\$2,310,000, and the cancellation of repurchased treasury stocks totaling NT\$22,180,000, become effective. Paid-in capital increased to NT\$2,563,411,940. |
| 2009/01 | 5th conversion of bonds to common shares based upon the 2006 1st issuance of overseas convertible bonds totaling NT\$18,783,480, and conversion of 1st issuance of employee stock option certificates to common shares totaling NT\$240,000, become effective. Paid-in capital increased to NT\$2,582,435,420. |
| 2009/05 | 6th conversion of bonds to common shares based upon the 2006 1st issuance of overseas convertible bonds totaling NT\$16,547,360, and conversion of 1st issuance of employee stock option certificates to common shares totaling NT\$600,000, become effective. Paid-in capital increased to NT\$2,599,582,780. |
| 2009/08 | Capitalization of earnings, capital reserve, and commission paid to employees increased cash by NT\$135,965,110. 7th conversion of bonds to common shares based upon the 2006 1st issuance of overseas convertible bonds totaling NT\$3,577,820, and conversion of 1st issuance of employee stock option certificates to common shares totaling NT\$50,000, become effective. Paid-in capital increased to NT\$2,739,175,710. |
| 2010/01 | 8th conversion of bonds to common shares based upon the 2006 1st issuance of overseas convertible bonds totaling NT\$27,477,410, and conversion of 1st issuance of employee stock option certificates to common shares totaling NT\$470,000, become effective. Paid-in capital increased to NT\$2,767,123,120. |
| 2010/04 | 9th conversion of bonds to common shares based upon the 2006 1st issuance of overseas convertible bonds totaling NT\$6,289,680, conversion of 1st issuance of employee stock option certificates to common shares totaling NT\$4,000,000, and conversion of 2nd issuance of employee stock option certificates to common shares totaling NT\$5,545,000, become effective. Paid-in capital increased to NT\$2,782,957,800. |

| Year/Month | Key Historical Events |
|------------|--|
| 2010/06 | Resolution approved by the 2010 Annual General Shareholders Meeting becomes effective to re-elect company's board of directors (9 seats, including 2 independent directors) and supervisors (3 seats) upon expiration of the term of their duties. |
| 2010/09 | Capitalization of capital reserve increased cash by NT\$52,718,850, becomes effective. Paid-in capital increased to NT\$2,835,676,650. |
| 2011/01 | 10 th conversion of bonds to common shares based upon the 2006 1 st issuance of overseas convertible bonds totaling NT\$8,656,080, becomes effective. Paid-in capital increased to NT\$2,844,332,730. |

(2) Board Independence

The Company conducts the election of directors under the principles of justice, fairness, and openness in accordance with the Company's Articles of Incorporation, Procedures for Election of Directors, Corporate Governance Best Practice Handbook, Regulations Governing Appointment of Independent Directors and Compliance Matters for Public Companies, Securities and Exchange Act Article14-2, and relevant laws and regulations. The composition of the board of directors consists is 3 independent directors (33%) and 6 non- independent directors (67%).

The Company puts emphasis on the independence of board operations. The independent directors shall also abide by the relevant laws and regulations, cooperate with the powers of the audit committee, review the management and control of the Company's existing or potential risks, etc., so as to supervise the effective implementation of the Company's internal control, the selection (dismissal) of certified public accountants and their independence, and the fair preparation of financial statements. In addition, according to the Company's "Rules for Election of Directors", the cumulative voting system and candidate nomination system are adopted for the selection of directors and independent directors, and shareholders are encouraged to participate. Shareholders who hold a certain number of shares or more may submit a list of director candidates. Qualification review and confirmation of any violations listed in Article 30 of the Company Act shall be conducted and announced in accordance with the law to protect the rights and interests of shareholders, avoid monopoly or excessive nomination rights, and maintain independence.

The Company has established a performance assessment system for the board of directors, and carries out an internal self-assessment of the board of directors and board members every year. Relevant self-assessment results are disclosed in the Company's annual report and official website after reporting to the Board of Directors.

(III) Employee Compensiton to the Management Team

As of April 30, 2023

| | $11 - 41 + 1 - 1 + 61^{\circ} + 1 - 1$ | 12 2022 4 1. 4.1 6 |
|-------------------------|---|-------------------------------------|
| Note : A resolution was | passed by the board of directors on March | 1 13, 2023 to distribute a total of |

NTD123,628,868 for 2022 employee compensation.

(IV) Comparison analysis of the current and previous fiscal years regarding the percentage of total remuneration paid to directors, supervisors, the general manager, and deputy general manager by the Company and by affiliated companies that are included in the consoliated financial statements to the net income, and its correlation with the remuneration payment policies, standards, and portfolios, the procedures for determining the remuneration, operation performance, and potential risks described in detail:

1. The percentage of total remuneration paid to directors, supervisors, the general manager, and deputy general manager by the Company and by affiliated companies that are included in the consoliated financial statements to the net income as of current and previous fiscal years:

(1)The total remuneration paid to the company's directors, general manager and deputy general manager in the past two years accounted for the proportion of after-tax net income:

| Ratio of total remuneration to net profit after tax | | | | | | | | | | | |
|---|--------|--------------|--------|--------------|--|--|--|--|--|--|--|
| | | 2021 | 2022 | | | | | | | | |
| Analysis | Gemtek | Consolidated | Gemtek | Consolidated | | | | | | | |
| | | Subsidiaries | | Subsidiaries | | | | | | | |
| | | of Gemtek | | of Gemtek | | | | | | | |
| Directors | 2.21 | 2.20 | 2.48 | 2.48 | | | | | | | |
| Presidents, and Vice- | 8.09 | 8.26 | 7.42 | 7.67 | | | | | | | |
| Presidents | | | | | | | | | | | |

2020 - 4.65%; 2021 - 10.47%; 2022 - 10.15%

In 2022, the proportion of remuneration of directors and supervisors, general manager and deputy general manager in after-tax net income decreased, mainly due to the decrease in the basic share-based payment amount in 2022.

(2)Correlation with the remuneration payment policies, standards, and portfolios, the procedures for determining the remuneration, operation performance, and potential risks:

Pursuant to Article 20 of the Article of Incorporation, the Company shall, after deducting the employee bonuses and renumeration benefits of directors from the current year's pre-tax benefits, allocate 13.5% for employee profit sharing bonuses and 1.8% for the renumeration benefits of directors and supervisors. Employee profit sharing bonuses are to be granted in the form of securities or cash to qualified company employees, which the occurrences are to be mentioned and reported in the shareholders' meeting. The Company shall not distribute bonuses in the event of accumulated losses

Pursuant to Article 20-1 of the Article of Incorporation, upon the closing of the Company's annual financial accounts, if surplus profit is determined, the Company shall first pay taxes and make up for all past losses; then, set aside a 10% legal capital reserve and a special capital reserve in accordance with applicable laws, rules and regulations. The remainder of the profits after deducting the foregoing shall be allocated as shareholders' dividends, subject to proposal by the board of directors and approval by shareholders at a shareholders' meeting.

Considering the current development status of the Company and the overall conditions of the industrial environment, other factors such as the Company's financial measures that might influence the financial structure and profit earnings are the key elements for determining the amount and type of surplus distributed. Bearing in mind the Company's capital requirements, long-term financial goals, and shareholders' demands for liquidity, the distribution of surplus profit shall be made preferably by way of cash and stock dividends. The distribution of cash dividends per year shall not be lower than 10% of the aggregate amount of the stock dividends and cash dividends distributed for that particular year.

Potential Risks:

The Company's remuneration is established upon a performance-related pay standard, which evaluates the overall performances of the company's operational outcomes, individual managers' achievements and contributions, and other factors that may influence the remuneration structure. If performances are recognized and approved by management, the fixed and variable rewards paid shall fully reflect the performances of either individuals or teams. If directors and employees are involved in illegal activities that cause losses to the company, they may be punished as necessary in accordance with legal provisions.

IV.Corporate Governance

(I) Operation Status of the Board of Directors

The Board of Directors held 9 [A] meetings during the current fiscal year. The attendance record of the Board of Directors is shown below:

| Title | Name (Note 1) | Attendance In Person [B] | Attendance by Proxy | Attendance Rate (%) (B/A) (Note2) | Remarks | |

| 4.5 Has the previously disclosed CSR report obtained verification from a third-party unit? | Yes | Acquired third-party verification for CSR Report. |

External Auditor Assessment Report regarding Independence and Competency

I. Statutory Provisions

- I. Pursuant to Article 29 of the "Corporate Governance Best Practice Principles for TWSE/ TPEx Listed Companies", the Company should select professional, responsible and independent CPA to regularly check the Company's financial status and internal control.
- II. The Company assesses the CPAs for their independence on a regular basis (once a year). If the Company has not changed its CPAs for seven consecutive years or is subject to disciplinary action or damage to its independence, the Company shall consider whether it is necessary to change the CPAs and report the results to the board of directors.
- III.According to No.46 Taiwan Generally Accepted Accounting Principles Quality Control Standards Article 68, the chief accountant or lead engagement partner is subject to rotation after the end of a certain assignment period. During the years following the rotation, he or she may not provide any services to the firm until a period of two years has elapsed.

II. Assessment Results:

| I. CPA Audit Opinions over the past five years: |

II. CPA Relationship Evaluation

(1) The evaluation is conducted in accordance with Code of Ethics for Professional Accountants No.10 - Integrity, Objectivity and Independence. The results are listed as follows:

| | Independence | In comp with a indeper standar require | uditor ndence rds and |
|------|--|--|-----------------------------|
| Item | Description | Yes | No |
| 1 | The accountants should avoid and should not accept the engagement when they may be involved in any direct or material indirect interests which may impair their impartiality and independence. | ν | |
| 2 | The audit or review of financial statements provides a wide range of potential statement users with a high or moderate but not absolute confidence herein. In addition to maintaining independence in fact, independence in appearance is critical as well. Therefore, the members of audit team, and the partners of the accounting firm and any of its affiliates must always maintain independence with his/their clients. | ν | |
| 3 | A professional accountant shall demonstrate the highest sense of integrity, maintain objectivity, and adheres to the spirit of independence when serving the public interest. (1)Integrity: A professional accountant shall perform all professional responsibilities with the highest sense of integrity. (2)Objectivity: A professional accountant shall maintain objectivity and be free of conflicts of interest in discharging professional responsibilities. (3)Independence: A professional accountant in public practice should be independent in fact and appearance when providing auditing and other attestation services. | ν | |
| 4 | Independence is defined to include integrity and objectivity. Lack of independence may impair the auditor's integrity, reliability, and objectivity. | ν | |
| 5 | Auditor independence may be compromised by threats to the fundamental principles self-interest, self-review, advocacy, familiarity and intimidation. | ν | |

| Independence | | In comp with au indeper standar require | uditor ndence ds and |
|--------------|--|---|----------------------------|
| 6 | Self-interest threat occurs when a firm or a person on the audit engagement team could benefit from a financial interest in, or other self-interest conflict with, a client. Examples of circumstances that may create a self-interest threat include, but are not limited to: (1) A direct financial interest or material indirect financial interest in a client. (2) A loan or guarantee to or from an audit client or any of its directors or officers. (3) Undue concern about the possibility of losing the audit engagement. (4) Having a close business relationship with an audit client. (5) Potential employment with an audit client. (6) Contingent audit fees related to the audit case. | ν | |
| 7 | Self-review threat occurs when accountants perform reports or judgments made in non-audit service cases, and such reports or judgments serve as an important basis for reaching conclusions in the process of checking or reviewing financial information, or when a person on the engagement team was previously an officer or director of the audit client, or was in a position to exert significant influence over the subject matter of the assurance engagement. Examples of circumstances that may create a self-review threat include, but are not limited to: (1) The members of the audit engagement team being, or having recently served as directors, supervisors, managers, or was in a position to exert significant influence over the subject matter of the engagement within the past two years. (2) Rendering non-audit services to clients with items that may directly impact the audited cases. | ν | |
| 8 | Advocacy threat occurs when the auditor is asked to promote or represent their client's opinion to the point where objectivity is potentially compromised. Examples of circumstances that may create an advocacy threat include, but are not limited to: (1)Dealing in, or being a promoter of, shares of an audit client. (2) Acting as an advocate for or on behalf of an audit client in litigation or in resolving disputes with third parties. | ν | |

| | Independence | In com with a indeper standar require | uditor ndence ds and |
|----|---|---|----------------------------|
| 9 | Familiarity threat occurs when, by virtue of a close relationship with an audit client, its directors, officers or employees, a firm or a person on the engagement team becomes too sympathetic to the client's interests. Examples of circumstances that may create a familiarity threat include, but are not limited to: (1) A person on the engagement team having an immediate or close family member who is an officer or director of the audit client or in a position to exert significant influence over the subject matter of the engagement; (2) A former partner of the firm, within one year before dismissal, serves as an officer or director of the audit client or exert significant influence over the subject matter of the firm, within one year before dismissal, serves as an officer or director of the audit client or in a position to exert significant influence over the subject matter of the engagement; (3) The acceptance of gifts or hospitality from the audit client, its directors, officers or employees, unless the value thereof is clearly insignificant. | v | |
| 10 | Intimidation threat occurs when a person on the engagement team may be deterred from acting objectively and exercising professional skepticism by threats, actual or perceived, from the directors, officers or employees of an audit client. Examples of circumstances that may create an intimidation threat include, but are not limited to: (1) Accountants are required to accept improper management choices in accounting policies or improper disclosure in financial statements. (2) The application of pressure to inappropriately reduce the extent of work performed in order to reduce or limit fees. | ν | |
| 11 | The firm, or members of the engagement team have an ongoing responsibility to maintain professional independence by taking into account the context in which they practise, the threats to independence and the safeguards which may be available to eliminate the threats or reduce them to an acceptable level. | ν | |
| 12 | If the firm, or members of the engagement team determine that the identified threats to compliance with the fundamental principles are not at an acceptable level, he/she shall address the threats by eliminating them or reducing them to an acceptable level. | ν | |
| 13 | If no measures are taken or the measures adopted cannot effectively reduce the impact on independence or reduce to an acceptable level, the accountant should refuse to execute the audit case to maintain its independence. | ν | |

(2) Auditor Competency

| | Competency | Qualific | ation |
|------|---|----------|-------|
| Item | Description | Yes | No |
| 1 | Holds a CPA license to practice public accounting. | ν | |
| 2 | No penalty imposed by the competent authority or the CPA Associations R.O.C.(Taiwan), or under the provisions of Paragraph 3, Article 37, of the Securities and Exchange Act. | ν | |
| 3 | Has a general understanding of the client's business. | ν | |
| 4 | Review financial reports and prepare audit worksheets in accordance with the "Generally Accepted Auditing Standards" and the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountant". | ν | |
| 5 | Uses the CPA title to benefit from acts of unfair competition. | | ν |

III. Conclusion:

Based on the above analysis, we conclude that CPA Jing Ting Yang and CPA Han Ni Fang of Deloitte & Touche, who were proposed to be retained for the audit of the Company's 2023 annual financial statements, are considered independent and competent. This matter is submitted to the board of directors for resolution.

(VII) If the Company has established corporate governance best practice principles and rules on ethical management, please specify websites or locations authorized for disclosure: All Corporate Social Responsibilities and relevant materials are disclosed in the Annual Report and Annual Shareholders Meeting Handbook For more information, please go to the MOPS website.

(VIII) Other information that may facilitate a better understanding of the Company's corporate governance and ethical practices: None

(IX) Implementation Status of Internal Control1. Internal Control System Statement

Gemtek Technologies Co., Ltd. Internal Control System Statement

Date: March 13, 2023

Based on the findings of a self-assessment, the Company states the following with regard to its internal control system for the current fiscal year:

I. The Company understands that the establishment, implementation and maintenance of internal control system are the responsibility of the Board of Directors and managers of the Company. The Company has established such system. Our internal control is a process designed to provide reasonable assurance over the effectiveness and efficiency of our operations (including profitability, performance and safeguarding of assets), reliability, timeliness, transparency of our reporting, and compliance with applicable rulings, laws and regulations

II. Any internal control system has its inherent limitations. No matter how well an internal control system is designed, it can only provide reasonable assurance regarding the achievement of the above three objectives. Moreover, the effectiveness of an internal control system may be altered as a result of changes in the environment and circumstances. Nevertheless, our internal control system contains self-monitoring mechanisms, and the Company takes immediate remedial actions in response to any identified deficiencies.

III. The Company evaluates the design and operating effectiveness of its internal control system based on the criteria provided in the Regulations Governing the Establishment of Internal Control Systems by Public Companies (herein below, the "Regulations"). The criteria adopted by the Regulations identify five key components of managerial internal control: (1) control environment, (2) risk assessment, (3) control activities, (4) information and communication, and (5) monitoring activities. Each criteria includes several items. For the aforementioned items, please refer to the "Regulations".

IV. The Company has evaluated the design and operating effectiveness of its internal control system according to the aforesaid regulations.

V. Based on the findings of such evaluation, the Company believes that during the current fical year, it has maintained, in all material respects, an effective internal control system (that includes the supervision and management of our subsidiaries), to provide reasonable assurance over our operational effectiveness and efficiency, reliability, timeliness, transparency of reporting, and compliance with applicable rulings, laws and regulations.

VI. This Statement is an integral part of the Company's annual report and prospectus, and will be made public. Any falsehood, concealment, or other illegality in the content made public will entail legal liability under Articles 20, 32, 171, and 174 of the Securities Exchange Act.

VII. This Statement was passed by the Board of Directors in their meeting held on Mar. 13, 2023, with 0 of the 9 attending directors expressing dissenting opinions, and the remainder all affirming the content of this Statement.

Gemtek Technologies Co., Ltd.

Chairman : Chen, Hong Wen

General Manager : Li, Rong Chang

2. If review of the internal control system has been conducted by entrusted CPAs, the CPAs' review report must be disclosed: None

(X) During the most recent fiscal year and as of the printing date of this annual report, did the Company or its internal personnel receive punishment in accordance with the laws? Did the Company's internal personnel receive punishment for violating the requirements of the internal control system? Please describe any defect found during the same period and its status of improvement: None.

* If the Company uses earnings or capital surplus to increase capital, the adjusted market price per share and cash dividends should be recalculated accordingly.

- Note 1: The highest market price and lowest market price should be listed. The average price is calculated by total transaction value and total transaction volume of each year.
- Note 2: Net worth per share is based on the distribution amount resolved by annual general shareholders' meeting and the shares issues at the end of the financial year.
- Note 3: If the Company distributes stock dividends, the earnings per share should be adjusted and disclosed as well.
- Note 4: If the conditions of the issue of equity securities regulated the undistributed dividends can be accumulated until profit year, the undistributed dividends should be disclosed.
- Note 5: Price / Earnings Ratio = Average Market Price / Earnings per Share
- Note 6: Price / Dividend Ratio= Average Market Price / Cash Dividends per Share
- Note 7: Cash Dividend Yield Rate = Cash Dividends per Share / Average Market Price
- Note 8 :Net Worth per share and Earnings per share as of the most recent quarter should be reviewed by the CPA and disclosed accordingly. Other items are disclosed as of the most recent fiscal year amid the printing of this annual report.

(VI) Dividend Policy and Implementation Status

1. Dividend Policy

According to the Company's Article of Incorporation, the Company shall, after deducting the employee bonuses and renumeration benefits of directors from the current year's pre-tax benefits, allocate 13.5% for employee profit sharing bonuses and 1.8% for the renumeration benefits of directors. Employee profit sharing bonuses are to be granted in the form of securities or cash to qualified company employees, which the occurrences are to be mentioned and reported in the shareholders' meeting. The Company shall not distribute bonuses in the event of accumulated losses.

Upon the closing of the Company's annual financial accounts, if surplus profit is determined, the Company shall first pay taxes and make up for all past losses; then, set aside a 10% legal capital reserve and a special capital reserve in accordance with applicable laws, rules and regulations. The remainder of the profits after deducting the foregoing shall be allocated as shareholders' dividends, subject to proposal by the board of directors and approval by shareholders at a shareholders' meeting.

Considering the current development status of the Company and the overall conditions of the industrial environment, other factors such as the Company's financial measures that might influence the financial structure and profit earnings are the key elements for determining the amount and type of surplus distributed. Bearing in mind the Company's capital requirements, long-term financial goals, and shareholders' demands for liquidity, the distribution of surplus profit shall be made preferably by way of cash and stock dividends. The distribution of cash dividends per year shall not be lower than 10% of the aggregate amount of the stock dividends and cash dividends distributed for that particular year.

2. The company's earnings can be paid out in either full or partial cash dividends or stock dividends. At present, the company distributes its profit earnings predominantly in the form of cash dividends. In 2021, the Company board of directors approved the distribution of cash dividends NT\$607,738,466 in total, which takes up 34.89% of retained earnings.

3. Implementation Status

Earnings distribution proposed at the most recent shareholders' meeting:

| 6 1 1 | U |
|--|-----------------------|
| | Unit: NT\$ |
| Item | Amount |
| 2021 Undistributed retained earnings | 1,133,996,527 |
| 2022 Profit after tax | 664,682,709 |
| Less: Adjusted retained earnings from Investments | 250,318 |

| Less: Debit retained earnings for Canceled Treasury Stock | 83,779,279 |
| Add: Recognized retained earnings from remeasurement of | 8,612,150 |
| Defined Benefit Plans | |
| Add:Transfer accumulated profit or loss to retained earnings | |
| for the disposal of equity investment instruments measured | 4,912,957 |
| at fair value through other comprehensive income | |
| Adjusted unappropriated retained earnings from current | |
| profit after tax and extraordinary items | 594,178,219 |
| Less: Legal Capital Reserve (10%) | 59,417,822 |
| Profit available for distribution for the current period | 1,668,756,924 |
| Shareholder dividend (NT\$1.5/share) | 591,711,716 |
| Undistributed retained earnings for the year end | 1,077,045,208 |
| Note 1: The dividend payout ratio was calculated based on 39 | 4,530,477 outstanding |

Note 1: The dividend payout ratio was calculated based on 394,530,477 outstanding common shares of the company as of March 13, 2023, excluding 56,000 shares of restricted employee stock that were redeemed due to capital reduction. The total number of common shares participating in this dividend distribution is 394,474,477.

4. Description of any material changes in the expected dividend policy: None

- (VII) Impacts on the Company's business performance, EPS, and shareholder ROI due to distribution of stock grants: Not applicable.
- (VIII)Compensation and Remuneration of Employees and Directors:
 - According to the Company's Article of Incorporation, the Company shall, after deducting the employee bonuses and renumeration benefits of directors from the current year's pre-tax benefits, allocate 13.5% for employee profit sharing bonuses and 1.8% for the renumeration benefits of directors. Employee profit sharing bonuses are to be granted in the form of securities or cash to qualified company employees, which the occurrences are to be mentioned and reported in the shareholders' meeting. The Company shall not distribute bonuses in the event of accumulated losses.
 - 2. The basis for estimating the amount of employees' compensation and directors' remuneration, for calculating the number of shares to be distributed as employee compensation and the accounting treatment of the discrepancy, if any, between the actual distributed amount and the accrued figure, for the current period:

The Company recognizes the 2021 employees' compensation and directors' remuneration according to the Company's Articles of Incoporation, as proclaimed, the Company shall, after deducting the employee bonuses and renumeration benefits of directors from the current year's pre-tax benefits, allocate 13.5% for employee profit sharing bonuses and 1.8% for the renumeration benefits of directors. In light of business circumstances, the Company did not distribute stock grants as of the recent fiscal year. In the event that the actual distribution amounts should be different from the accrued amounts, the adjustment will be recognized in the distribution year as changes in accounting estimates.

3. Compensation and Remuneration Approved by the Board:

(1)Distribution of Employee Bonuses and Renumeration Benefits of Directors:

A. Employee Cash Bonuses : NT\$123,628,868

B. Renumeration Benefits of Directors : NT\$16,483,849

- (2)The 2022 distribution of employee bonuses and renumeration benefits of directors was approved by the Board. There are no adjustments to be made due to the fact that there are no significant differences between the actual distributed amount NT\$140,112,717 and the estimated amount recognized as expense NT\$140,112,717.
- (3)The ratio of the total amount of employees compensation distributed in stocks to the sum of the after-tax net income amount stated in the financial reports of

the parent company or individual financial reports for the current period plus total amount of employees' compensation: Not applicable.

4. The distribution status of employees compensation and directors remuneration of the previous year (including distributed shares, amount, and stock price) and, if the amounts distributed vary from the amounts recognized, please illustrate the reason for the discrepancy and how it is treated:

| | Employee Compensation and Director Remuneration | | | | | |
|--------------|---|---------------------|------------------|--|--|--|
| Item | Approved by the Shareholder Meeting | | | | | |
| Itelli | $\Lambda m ount(NTD)$ | Cash Increase | Cash Distributed | | | |
| | Amount(NTD) | Converted to Shares | Cash Distributed | | | |
| Employee | | | | | | |
| Compensation | 112,689,232 | - | 112,689,232 | | | |
| 13.5% | | | | | | |
| Director | | | | | | |
| Remuneration | 15,025,231 | - | 15,025,231 | | | |
| 1.8% | | | | | | |

Employee Compensation and Director Remuneration

| Item | Stock Dividend | | | Cash Dividend | |
|--------------|----------------|--------|--------|---------------|-------------|
| | Stock | Shares | Amount | Amount | Total |
| | Price | | | | |
| Employee | | | | | |
| Compensation | - | - | - | 112,689,232 | 112,689,232 |
| 13.5% | | | | | |
| Director | | | | | |
| Remuneration | - | - | - | 15,025,231 | 15,025,231 |
| 1.8% | | | | | |

Description: There are no significant differences between the actual distributed amount and the estimated amount recognized as expense.

(IX)Repurchase of Treasury Stock:

1.Implementation Status: Already Completed

| | As of Date. December 51, 2025 |
|---|--|
| Term of Repurchase | 10th |
| Reason | Maintain Company Credibility and Shareholder Equity |
| Repurchase Period | April 21, 2022 – June 20, 2022 |
| Repurchase Price Range | NT\$28.00~NT\$38.00 |
| Type and Number of Shares Repurchased | 10,342,000 Common Shares |
| Total Value of Repurchased Shares | NT\$307,112,242 |
| Ratio of the number of shares already repurchased to the number of shares intended to be repurchased (%) | 51.71% |
| Number of Cancelled and Transferred Repurchased Shares | 10,342,000 Common Shares |
| Accumulated number of the Company's shares held by the Company | 0 shares |
| Ratio of the accumulated number of the Company's shares held by the Company to the total number of issued shares (%) | 0% |

As of Date: December 31, 2023

2.Repurchase of Treasury Stock In Progress: None

II. Domestic & Overseas Corporate Bonds

III.Preferred Stock: None

IV.Global Depository Receipts: None

V.Employee Stock Options: None

VI.New Restricted Employee Shares:

(I)Implementation of New Restricted Employee Shares

| | New Restricted Employee Shares |
|---------------------------|---|
| Type of New Restricted | 2 nd Issuance |
| Employee Shares | New Restricted Employee Shares |
| Effective Date | July 14, 2020 |
| Date o Issuance | August 07, 2020 |
| Issued Shares | 4,000,000shares |
| Issue Price | NTD10 |
| Percentage of Issued New | |
| Restricted Employee | 1.100/ |
| Shares to Total Number of | 1.10% |
| Issued Ordinary Shares | |
| Vesting Conditions | If an employee still serves the Company for one year after the subscription of New Employee Retricted Stock, provided that the employee has not violated the Company's labor contract, work rules, or company regulations, and under the circumstance that the overall business operations and employee performances have reached the reasonable targets set out by the Company for the preceding year, the ratio of shares that can be vested is: 30%. If an employee still serves the Company for two years after the subscription of New Employee Retricted Stock, provided that the employee has not violated the Company's labor contract, work rules, or company regulations, and under the circumstance that the overall business operations and employee performances have reached the reasonable targets set out by the Company for the preceding year, the ratio of shares that can be vested is: 30%. If an employee still serves the Company for the preceding year, the ratio of shares that can be vested is: 30%. If an employee still serves the Company for the preceding year, the reasonable targets set out by the Company for the preceding year, the reasonable targets set out by the Company for the preceding year, the ratio of shares that can be vested is: 30%. If an employee still serves the Company for three years after the subscription of New Employee Retricted Stock, provided that the employee has not violated the Company's labor contract, work rules, or company regulations, and under the circumstance that the overall business operations and employee Retricted Stock, provided that the employee has not violated the Company's labor contract, work rules, or company regulations, and under the circumstance that the overall business operations and employee performances have reached the the employee has not violated the Company's labor contract, work rules, or company regulations, and under the circumstance that the overall business operations and employee performances have reached the< |

| | reasonable targets set out by the Company for the preceding year, the ratio of shares that can be vested is: 40%. |
|--|---|
| | 1.Before vesting conditions are met, employee restricted stocks received by the employee are not to be sold, mortgaged, transferred, gifted, pledged, or otherwise sanctioned except in the event of inheritance. |
| Vesting Limits | 2. The attendance, proposal, speech, and voting rights of the shareholders meeting shall be implemented in accordance with the trust custody agreement. Any cash dividends, stock dividends, and capital reserve cash (stocks) allocated to the New Employee Restricted Stocks shall be placed under the custody of the trust. For those New Employee Restricted Stocks whom their owners have not yet fulfilled the vesting conditions, the cash dividends, stock dividends, and capital reserves (stocks) generated shall be forfeited and being reclaimed or cancelled by the Company in accordance with relevant laws and regulations. |
| Custody | Entrusted with custodian |
| Measures to be taken when employees fail to meet the vesting conditions | If the employee fails to meet the vesting conditions, or has violated the Company's labor contract, work rules, or company regulations, and under the circumstance that the overall business operations and employee performances have not reached the reasonable targets set out by the Company for the preceding year, the Company shall redeem the shares under no additional cost and consideration, and holds the right to cancel the shares according to law. |
| Redeemed or Repurchased New Restricted Employee Shares | 526,500 shares |

Note 1: Name and titles of employee restricted stock owners, including managers and employees (resigned or deceased individuals should be denoted) ought to be disclosed. The number of shares received or subscribed are presented in aggregate.

Note 2 : Refers to non-managerial employees who are the top 10 major owners of employee restricted stock.

VI. <u>Status of New Shares Issuance in Connection with Mergers and</u> <u>Acquisitions: None</u>

VII..Financing Plans and Implementation: None

V. Operational Highlights

I.Business Activities

(I)Business Scope

- 1. The scope of business of the Company shall be as follows:
 - (1)Research, development, manufacture, purchase and sale of electronic components, semi-finished products and finished products;
 - (2)Research, development, manufacture, purchase and sale of computer software, hardware and peripheral equipment;
 - (3)Import-export trading business in relation of the foregoing products;
 - (4)CC01101 Restricted telecom radio frequency equipment and materials manufacturing;
 - (5)F401021 Restricted telecom radio frequency equipment and materials import;
 - (6)E701031 Restrained telecom radio frequency equipment and materials construction;
 - (7)F113070 Wholesale of telecom instruments; and
 - (8)F213060 Retail sale of telecom instruments.

| 2. 2022 Proportion of each product | (service) to total business operations |
|------------------------------------|--|
|------------------------------------|--|

| Product | Ratio |
|----------------------------|---------|
| WLAN CARD | 11.89 % |
| WIRELESS GATEWAY | 79.47 % |
| WIRELESS TELECOMMUNICATION | 0.94 % |
| MODULE | |
| OTHERS | 7.70 % |
| TOTAL | 100.00% |

3. Product Portfolio

| Product Name | Purpose and Function | | | |
|-------------------|---|--|--|--|
| WLAN CARD | Office computers and wireless | | | |
| WLAN CARD | transmission equipment | | | |
| WIRELESS GATEWAY | Wired and wireless network transmission | | | |
| | equipment | | | |
| WIRELESS | Wireless transmission module for IoT | | | |
| TELECOMMUNICATION | equipment | | | |
| MODULE | | | | |
| OTHERS | Buying and selling of wires, packaging | | | |
| OTHERS | materials, pallets and raw materials | | | |

4.New Reasearch and Development Plans

- A. 5G NR R16 Standardized CPE
- B. 5G Small Cell End To End System Development
- C. Computer vision-based Wireless SIP Module Multi-Scan Solution
- D. Enterprise-grade WiFi platform development
- E. GPON/XGSPON 2-in-1 Passive Optical Network access to Ultra-wideband Network Integration System development plan
- F. High performace enterprise xPON/g.fast integration univeral platform development based on open software architecture
- G. Easy deployment and cost effective 5G NR FR1+ FR2 ODU CPE development
- H. Cost effective 5G NR smallcell development for sharedband CBRS
- I. Scalable Phased Array Antenna Development for LEO application ka/ku band
- J. High performance WiFi 7 AP platform development
- K. Tiny compact WiFi 7 extenter development
- L. Cost-effective WiFi 6/6e AP platform development
- M. Universal smart element management system software platform development
- N. Cost-effective switch platform development

(II)Industry Overview

1. The Status and Development of Industry

Ericsson's 2022 Mobility Report reveals that the 5G penetration rate is steadily growing and is estimated to reach the milestone of one billion subscribers by the end of 2022. Furthermore, 2023 will bring more 5G smart devices with more capabilities, which is expected to increase the demand for 5G in the market. Ericsson predicts that the number of 5G subscribers will surpass five billion by 2028. As of 2022, North America and North East Asia are expected to have the highest 5G subscription penetration by the end of 2022 at around 35 percent, followed by the Gulf Cooperation Council countries at 20 percent and Western Europe at 11 percent. The United States is still leading the market with 80% coverage nationwide.

Looking ahead to 2023, the commercialization of 5G technology is about to enter its fourth year, and the global 5G industry is expected to experience accelerated growth from this year forward. Growth will depend on several factors, including macroeconomic development and component availability. In 2023, 5G devices are expected to evolve with more spectrum aggregation capabilities (4CC DL, 2CC UL and NR-DC) plus improved power efficiency and low-latency capabilities. With the gradual evolution and maturity of 5G, we can expect an increase in demand and application for 5G in both commercial and consumer markets. As more 5G spectrum bands become available, service providers are able to strategize deployment in various approaches via three different radio spectrum bands, each with its own set of characteristics and benefits (mid-band, low-band, and millimeter wave), enabling 5G services with the flexibility to serve multiple use cases with different requirements by ensuring that devices are connected using the most appropriate band.

As of March 2023, smartphone subscriptions were estimated to account for 51.4% of all 5G mobile subscriptions globally. Fixed wireless access (FWA) connections come in second, comprising 15.3% of all 5G subscriptions worldwide. FWA is a low-cost, easy-to-deploy and flexible broadband solution compared to fixed networks. For 5G service providers, FWA allows for the same base station to serve both mobile and home users simultaneously, reducing the cost for building base stations. In addition, FWA is an efficient and scalable alternative to wired connections for reliable home broadband, enabling wireless communications service providers to compete with cable TV providers.

According to Ericsson's 2022 Mobility Report, more than three-quarters of service providers surveyed in over 100 countries are now offering Fixed Wireless Access (FWA) services (including LTE and 5G). Nearly one-third of service providers are now offering it over 5G, compared to one-fifth a year ago. As the penetration rate of 5G increases, FWA is growing strong, with 300 million connections projected in 2028. The report also predicts that 5G mobile subscriptions are to reach 5 billion in 2028

In terms of wired broadband networks, the mainstream connectivity technology is PON (Passive Optical Network), which includes GPON (Gigabit Capable PON), XG-PON (10 Gigabit Capable PON), and EPON (Ethernet PON). The difference between fiber optic and other bandwidth services is that the fiber optic technology uses optical fibers to transmit data as light signals while others use electronic signals. Fiber optic technology has three major advantages: Superior Connection Quality, Increased Bandwidth, and Secure Communication. Additionally, fiber optic networks is capable of transmitting light signals over long distances without significant attenuation (loss) or interference from outside sources, as a result. XGS-PON can achieve an astonishing transmission speed of 10Gbit/s for both upstream and downstream.

Ever since the outbreak of COVID-19 in 2020, it has led to an increase in the demand for broadband network infrastructure due to the rise in remote work and distance learning. While the pandemic's peak has passed, the continuous mutation of the virus over the past year has caused a resurgence of the epidemic globally. Consequently, numerous companies have implemented hybrid work models to adapt to this phenomenon and expedited their digital transformation strategies. Furthermore, people's lifestyles have undergone a significant shift, and individuals and companies alike continue to have a high demand for bandwidth. They anticipate service providers to deliver faster and more reliable network services. Research states that the number of fiber optic internet connections continues to grow. The Institute for Information Industry has pointed out that since 2016, the proportion of FTTH (Fiber to the home) has been gradually on the rise. By 2022, the number of FTTH households is expected to reach 740 million, with Asia as its largest market. The growth momentum in Asia is being driven by the implementation of government policies aimed at upgrading networks. China, India, Vietnam, and Indonesia have all proposed their broadband infrastructure policies. For instance, China is planning to launch its Dual Gigabit Network Coordinated Development Action Plan, which seeks to foster the development and adoption of innovative applications and solutions for mobile and home broadband, with the goal of achieving Gigabit standards by 2021-2023. This plan involves the construction of new facilities and upgrades to existing systems. In India, the country has granted a public-private partnership allowance for broadband. As for South Korea and Japan, service providers are enticing customers to use optic fiber network services by providing price differentials in network upgrades.

In North America and Central and South America, service providers and cable television providers share a long history in terms of competition. In the United States, two major broadband policies exist: the Rural Digital Opportunity Fund (RDOF) with a subsidy of \$20.4 billion, which incentivizes service providers to expand and construct 1Gbps networks into sparsely populated areas; and the Broadband Equity Access and Deployment Fund (BEAD) with a subsidy of \$42.55 billion, to encourage service providers to adopt broadband technologies, such as fiber, to deliver networks with speeds of 100Mbps or higher. Intense competition among service providers is also fueling the adoption of optic fiber services.

In Europe, the European Commission is supporting EU businesses, project managers and authorities in increasing network coverage. The connectivity objectives of the Gigabit Society for 2025 and the Digital Decade for 2030 includes access to Gigabit connectivity, 5G coverage, and connectivity offering at least 100 Mbps for all European households by 2025 and 1 Gbps by 2030. The Commission has launched a fund to develop broadband network infrastructure across underserved areas of Europe, such as the UK, Germany, and Italy, and encourage service providers to increase their investment in fiber optic infrastructure. Fiber optic connection penetration rates among European countries differ immensely. For example, Germany's fiber optic penetration rate is only 6%, while Spain's is 76.2%. However, since the rollout of EU's broadband support, demand for fiber optic deployment in European countries have increased.

In addition to terrestrial 5G infrastructure, Low Earth Orbit (LEO) satellites are anticipated to substantially enhance global network coverage. Currently, one-third of the world's population lacks access to internet services, and LEO satellites can fill the gaps in remote areas that fixed networks cannot reach, or in areas where ground network coverage is not economically feasible, thereby unifying a globally dispersed market. LEO is also viewed as the foundation for realizing the Internet of Things (IoT), with potential applications in agriculture, industry, environmental monitoring, and other areas. Besides commercial use, the Starlink terminal devices provided communication services to the Ukrainian people during the Russo-Ukrainian War, underscoring the strategic significance of LEO technology. As of January 2023, American satellite service provider SpaceX has launched a total of 3,300 LEO satellites, making it the leader among service providers, offering services in 45 countries. UK LEO satellite service provider OneWeb now has a total of 542 satellites in orbit, with more than 80% of its first-generation constellation launched. That leaves two launches remaining to complete its first-generation constellation and activate global coverage in 2023. Canadian service provider Telesat is expected to enter the commercialization phase in the second half of 2023, having already launched 188 satellites. Research institutions have predicted that the global LEO satellite market size will grow from \$4.29 billion in 2022 to \$5.26 billion in 2023, at a compound annual growth rate of 22.6%.

2. The Industry's Upstream, Midstream and Downstream Operations

The wireless LAN industry-value chain starts with upstream IC design houses (Broadcom, Qualcomm and Sigma Design, etc.), IC manufacturers (TSMC, UMC, etc.) and travels to midstream and downstream system design and manufacturing (Gemtek, CyberTAN, Askey Computer, Asus, etc.) and product sales companies (Belkin, Buffalo, Intel, etc.). Gemtek's product supply chain begins with the purchasing of electronic components such as integrated circuits and circuit boards, which the materials would be placed through the SMT assembly process, testing, completion, and are then sold directly to assembly system companies or to general users through retail distributors. The Company's line of business involves midstream manufacturing with connections to various manufacturers in the industry, depicted as follows:

| <u>Upstream</u> | Midstream | <u>Downstream</u> | . : | Application |
|-----------------|---------------|-------------------|-----|-------------|
| IC Design | System | Retailer/ | | PC Users/ |
| House/ | Developer and | PC OEM/ | | Application |
| IC | Manufacturer | System | | System |
| Manufacturer | | Integrator | | Developer |

3. Product Development Trends and Competition

As we head towards 2023, with increasing vaccination rates and the pandemic gradually coming under control, many countries are starting to ease their lockdowns, and the trend of staying at home is gradually diminishing.

Nevertheless, the virus has continued to mutate over the past year, causing recurring outbreaks of the pandemic worldwide. Consequently, numerous companies have implemented hybrid work models and expedited their digital transformation strategies. Additionally, people's lifestyles have undergone a complete transformation. Therefore, the outlook for the future market of communication products remains optimistic.

During 2022, the market witnessed an explosive growth in two emerging technologies, namely Wi-Fi 6 and 10 GPON, which were highly favored by consumers. Wi-Fi 6 garnered a remarkable penetration rate of approximately 50-60% within the PC market, while routers were able to achieve a rate of around 40%. Compared to the previous year (2021), the rise in the adoption rate of Wi-Fi 6 was quite substantial. Furthermore, prominent chip manufacturers have been introducing Wi-Fi 7 solutions, one after the other. However, owing to factors such as the overall economic climate and the emergence of new application scenarios, it is anticipated that there won't be a significant surge in demand until 2025.

According to the Industry Research Report by the Institute for Information Industry, Japanese and Korean service providers started offering 10G home services as early as 2018. These services have been accompanied by preferential pricing plans that have effectively enticed users to upgrade their home networks. With only a \$7 price difference between 5 Gigabytes and 10 Gigabytes, consumers are drawn to the affordability of 10G fixed broadband services. In Europe, due to the low penetration rate of fiber networks, many service providers opt to upgrade directly to the highest standard of 10G service at once. After 2022, service providers, such as Deutsche Telekom and Orange in France, have begun widely deploying XGS PON. As for Telefonica (Spain Telecom), it has announced plans to utilize 50GPON starting in 2025. Turning to Asia, the demand for PON in the Chinese market has seen a considerable boost, which can be attributed to the upgrade requirements for the national telecommunication project established by the Chinese government. According to chipmakers, the overall demand scale of PON in China saw an increase of at least 15% in 2022 as compared to the previous year. The adoption rate of 10G PON has surged from almost zero penetration to around 20%, resulting in a twofold increase in both price and quantity. This increased penetration rate of 10G PON is expected to boost the acceptance of Wi-Fi 6 in the Chinese market.

When it comes to wireless wide area network (WAN) communication, Fixed Wireless Access (FWA) can be categorized into three technical specifications: LTE, 5G, and millimeter wave (mmWave). MmWave is a high-frequency spectrum of the 5G band, which lies above 24GHz. Utilizing the 5G mmWave spectrum is the most efficient way to establish high-speed and large-capacity networks. This technology can offer the best 5G experience in densely populated areas where network congestion is common. At present, 5G mmWave technology and its application scenarios are still in the nascent stage. During the 2023 Mobile World Congress (MWC), Qualcomm, Telefonica, and Ericsson made an announcement about the launch of Spain's first commercial mobile 5G mmWave network. This milestone in technology will allow compatible user devices to access the Telefonica 5G mmWave network powered by Ericsson during the conference. Qualcomm showcased an extensive array of 5G mmWave devices, enabled by Snapdragon mobile platforms, posing as a major driver for the growth of the mmWave industry. Meanwhile, the demand for switches is expected to rise, with a projected TAM (Total Addressable Market) growth of roughly 10% annually for the next 3-5 years starting from 2022.

Specifications and applications of various types of wireless network technologies:

| Technology | 3G | 4 G | 5G |
|--------------------------------|--|---|---|
| Time of Creation | 1998 | 2008 | 2019-2020 |
| Bandwidth (Uplink/Downlink) | 64K/2M | 50M/100M | Approx. 500M/1G |
| Type of Multiple Access | FDMA/CDMA | FDMA/OFDM | OFDM |
| Channel Bandwidth | 5MHz | 20MHz | 100MHz (Below 6GHz) 400MHz (Above 6GHz) |
| Transmission Speed | 70Mbps | 64k~1Mbps | 150Mbps ~ over 1Gbps |
| Application | Mainly used for sending and receiving short messages. | Sending and receiving text messages. Internet browsing speed is much smoother than 3G. | Sending and receiving text messages. Internet browsing, watch 4K videos without delay. Used in innovative applications such as the Internet of Vehicles and the Internet of Things. |
| Details | Cellular network mobile phone technology that supports high-speed data transmission. 3G service can transmit voice (calls) and information (email, instant messaging, etc.) at the same time. The representative feature of 3G is to provide high-speed data services, with a speed generally above several hundred kbps. | technical standards and ITU's definition, when the static transmission rate reaches 1Gbps, and the user reaches 100Mbps under high-speed movement,it can be deemed as | The main advantage of the 5G network is that the data transmission rate is much higher than the previous cellular network, reaching up to 10 Gbit/s, which is 100 times faster than the current wired Internet and faster than the previous 4G LTE cellular network. Another advantage is its lower network latency (faster response time), which is less than 1 millisecond, compared to 30-70 milliseconds for 4G. |

(III)Research and Development Overview

1.R& D Expenses by recent years and as of the publication of this Annual Report

| | UIII | t. New Talwall Dollal, 70 |
|----------------------------------|------------|---------------------------|
| Item | 2021 | 2022 |
| Investments | 753,460 | 916,227 |
| Operating Revenue | 22,912,691 | 27,899,990 |
| As a percentage of total revenue | 3.29 | 3.28 |

Unit: New Taiwan Dollar ; %

Note: No financial forecasts have been prepared for 2023

2. Recent Research and Development Achievements

| Year | Achievements |
|------|---|
| | 1. GPON/XGSPON /10GEPON/DPoE/NGPON2 product development. |

| 14.Scalable Phased Array Antenna Development for LEO application |
| ka/ku-band |
| |

(IV)Short-term and Long-term Business Development Plans

(1)Short-term Business Development Plans

A.Marketing Policies

a.Customer Retention and Market Expansion

Learn about customer demands and market trends. Expand the scope of services on the basis of existing production capacity and professional knowledge to expand the scale of business.

b. Complete Marketing Channel

Set up domestic and overseas offices and liaisons through subsidiaries and strategic alliances and maintain a good rapport with distributors to form a well-structured marketing channel.

c. Complete After-Sales Service

Establish quality control inspections. Provide after-sales consultation and maintenance services.

B.Production Policy

a. Reduce Production Costs and Improve Production Efficiency.

Strengthen product planning and quality control. Train and develop employees. Implement budget and cost control to improve production efficiency and reduce production costs.

b. Product Inspection and Quality Control

Implement ISO-9001:2015 and TQM to enhance overall product inspection and manufacturing quality.

C.Industrial Development

The Company researches and develops wireless communication products such as wireless network cards and wireless gateways. In addition to seeking continuous improvement in the quality of existing products, the company continues to develop products that are in line with the latest technical standards and design wireless multimedia products and services to meet market demands.

D. Business Scale

Seek opportunities to expand business scale in order to achieve the Company's short-term goals in marketing, production, and R&D,

E. Finance

Obtain adequate sources of funding and investment plans to facilitate the Company's manufacturing and development goals.

(2)Long-term Business Development Plans

A. Marketing Strategy

a. Follow market trends. Launch new products. Expand global market.

b.Work with large-scale international businesses through strategic alliances or technical cooperation to win OEM / ODM orders.

B.Production Policy

a. Material Requirements Planning

Continue to improve the Company's Material Requirements Planning (MRP) system to maintain smooth operation, effective capacity and production quality. The goal is to enhance the overall efficiency of the supply chain and production lead time.

b. Automation

In order to successfully transition to production line automation, the Company needs to devise new product line layouts, invest in the professional training and development of operators, and discover more advanced manufacturing processes besides adding new machinery and equipment to the entire plan.

C.Product Development

Taiwan's telecommunications industry incorporates various types of technologies to facilitate the construction and development of wireless communication networks. Ranging from wireless base stations, Wi-Fi6 routers, modules, to LTE terminals and LTE small cell products, and 5G and Pre-5G products in response to the advent of 5G technology, then supplemented by wired G.fast and GPON with its existing copper cables to achieve 1 Gps in the last mile to replace expensive optical fiber -----the amalgamation of technologies has helped telecom operators to deploy and operate with better efficiency.

Bearing in mind its long-term global expansion goals, the Company devotes itself to the advanced development of wireless communication network software, hardware, application services, and product integration devices to satisfy customer requirements. The Company also invests heavily on the research and development of new technologies and products and seeks opportunities to work closely with enterprises through technology collaboration. The Company wishes to combine the next-generation 5G and Wi-Fi and other wireless technologies with its existing telecommunication architecture to achieve higher market growth and business profit.

D. Business Scale

Adhere to the concept of corporate sustainability. Establish a good corporate culture. Extend short-term development plans to accommodate growing business operations.

- E. Finance
 - a. Train and develop financial and accounting professionals..

b. Strengthen comprehensive financial planning to reduce operational risks and enhance competitiveness.

II. Market Analysis and Status of Goods Production and Sales

(I)Market Analysis

1.Global Sales Regions and Statistics

| | Year | 2021 | 1 | 2022 | | | |
|--------|----------|------------|--------|------------|-------|--|--|
| Area | | Amount % | | Amount | % | | |
| Ι | Domestic | 997,342 | 4.35 | 682,028 | 2.44 | | |
| Overse | Asia | 6,389,047 | 27.89 | 6,038,146 | 21.64 | | |
| as | Europe | 5,506,879 | 24.03 | 6,047,532 | 21.68 | | |
| | America | 10,007,502 | 43.68 | 14,931,672 | 53.52 | | |
| | Pacific | 0 | 0.00 | 156,825 | 0.56 | | |
| | Africa | 11,921 | 0.05 | 43,787 | 0.16 | | |
| Total | | 22,912,691 | 100.00 | 27,899,990 | 100 | | |

2.Market Share

In recent years, Gemtek had become widely successful with its advanced developments in the telecommunications market and has therefore been able to expand its worldwide businesses by leaps and bounds. By following the technological trend in telecommunications infrastructure services, the Company's main sales products has been keenly focused on fiber-optic access point, LTE, 5G, and Wi-Fi devices. Based on its in-house R&D advantages, the Company was able to launch new projects and come up with numerous innovative products at the same time.

The growing surge in telecommunications infrastructure and commercial networks deployment has led telecom carriers in many countries eager to upgrade their network capacity almost instantly. In 2022, Gemtek's global sales has vastly expanded and its worldwide market share has also continued to increase exponentially.

3. Future Outlooks on Market Supply and Demand

According to data from research institutions, the global 5G infrastructure market is expected to reach US\$80.5 billion by 2028, with a compound annual growth rate of 49.8%. It is expected that the growth rate of 5G ecosystem transformation will be faster than that of other mobile communication technology transformations 3-4 times. According to Ericsson's Mobility Report of 2022, despite a weaker economy and

geopolitical uncertainties, service providers continue to deploy 5G, with 228 having already launched commercial 5G services globally

The Consumer Technology Association's 2022 report stated that the global demand for both hardware and software products such as IoT and cloud applications, mobile devices, and emerging technologies such as network virtualization, AI, 5G, LPWAN, and edge computing in 2022 will grow higher than the precedent year, giving rise to the need for more advanced wireless and wired network communication technologies. Moreover, the importance of network infrastructure and power plants has never been more apparent due to the outbreak of the Covid-19 pandemic and the Ukrainian-Russian war. These infrastructures are considered to be robust rigid demands, and therefore its relevant technologies is likely to continue to grow in the future.

4. Competitive Niche

A. Professional and Reliable Management Team

The Company's management team has many years of accumulated technological experience and are all veterans in the industry. They have the core technological knowledge and the ability to develop new products on their own. Consequently, their contributions has facilitated the Company to maintain a good competitive edge and remain second to none as a world leading manufacturer.

B.Complete Product Line and Effective Manufacturing

The company has been in the field of wireless communication since 1994. It has a complete product line of wireless devices and automated manufacturing processes. Based on years of broad experience, the company continues to refine its production abilities in terms of design quality and manufacturing effectiveness. The Company is recognized by international business partners for its superior product stability.

C. Excellent R&D and Production Capabilities

The company's R&D department continues to engage in the improvement of existing products, and pursue product innovation and diversification. Beginning from multimedia systems to the current wireless LAN network card products, the Company has always been able to keep pace with market trends, launch innovative products and increase overall profitability.

D. Well-Estabslihed Management System and Harmonious Labor Relations

The Company is well aware that if it wants to stay ahead in an increasingly competitive and volatile environment, and seek long-term sustainability in the market, the central strategies are to strengthen the company's management system and to elevate the effectivenee of employee training and development. In addition, a harmonious labor-management relationship is also a very important part, which needs to be backed by a good employee welfare system. In view of this, in addition to establishing a reasonable and sound management system through a written and standardized system, the company also pays special attention to employee welfare and workplace camaraderie to maintain harmonious labor relations, improve operating performance, and increase business profit.

E. Stable Customer Base and Complete After-Sales Service

The Company received the ISO9001 certification in 1999 and is a certified manufacturer. The Company attaches great importance to product quality and customer satisfaction, and maintains long-term partnerships with customers. The company has established a complete customer inquiry system and after-sales service.

5.Favorable and Unfavorable Factors in Prospects and Countermeasures

A.Favorable Factors

a. High Potential in Development Across the Industry

With the liberalization of global telecommunications, and the rapid development of mobile communications and networks, the communications technology is still the leading trend in the technological industry.

b. Has Obtained International Recognition

The Company is committed to the research and development and production of wireless LAN products. Its products and service applications continues to exhibit excellent quality, and has successfully won the recognition of international business partners.

c. Independent Research and Development Capabilities

The Company's management team has many years of accumulated technological experience and are all veterans in the industry. They have the core technological knowledge and the ability to develop new products on their own. Consequently, their contributions has facilitated the Company to maintain a good competitive edge and develop new products with accelerated speed.

d. Superior Quality

In terms of quality, the Company conducts strict testings and quality controls to deliver the best products to its customers. In terms of price, the Company implements a set of effective strategies in product planning and positioning, giving its business pricing a competitive edge. In addition, the company has established a good reputation with its outstanding after-sales service, which all contributes to the advanced development of the company.

e. Global Production Lines

In response to the changing geopolitical situation, the Company has also established offshore production lines in countries such as mainland China, Vietnam, and the Czech Republic. In terms of structural risk diversification, setting up manufacturing locations other than mainland China has helped clients avoid high tariffs created by the Sino-US trade war.

f.China-Free Internet

On April 29, 2020, the U.S. Department of State announced that the U.S. will begin requiring a Clean Path for all 5G network traffic entering and exiting U.S. diplomatic facilities. In August of the same year, the U.S. Secretary of State announced the expansion of The Clean Network to include Clean Carrier, Clean Store, Clean Apps, Clean Cloud, and Clean Cable. Telecom operators in the United States and its European and American allies began to remove Chinese manufactured equipment from the supply chain. The once Chinese-dominated market was therefore divided among European and American companies which in turn benefited the network technology industry in Taiwan immensely.

B. Unfavorable Factors and Countermeasures

a. Low-Cost Competition

Due to fierce competition in the market, business rivals often compete by cutting prices, which results in the declination of business profits.

Countermeasures

The Company is working towards the research and development of high profibility products, and hopes to expand the scale of operations and improve manufacturing processes to reduce production cost. At the same time, the Company plans to provide custom integrated services to enhance the overall performance of hardware device products, software, and cloud maintenance services.

b. Currency Fluctuation Risks

The Company sells products denominated in U.S. dollars. The appreciation of the New Taiwan Dollar will adversely affect revenue caused by foreign exchange losses. The Company has adopted measures such as currency hedging and customer negotiations to reduce the impact of exchange rate fluctuations.

Countermeasures

Adopt financial hedging strategies and negotiate with customers to adjust product prices.

- (II) Main Products and Manufacturing Process
 - 1. Main Products

Gemtek's wireless broadband products mainly consists of LTE data terminal routers. LTE is not only widely used among small units such as individuals and families, but also by large entities as in enterprises and factories. Wireless LTE can be deployed in wide metropolitan areas, and even in remote towns, pastures, and open landscapes, saving significant amount of cost in contrast to setting up wired network infrastructures. Gemtek owns a complete set of production lines designated to LTE portable routers, indoor routers, outdoor routers, and micro base stations to satisfy the different application requirements of operators and market demand.

The LTE system architecture includes Evolved Packet Core (EPC) and Evolved Universal Terrestrial Radio Access Network (E-UTRAN) [1]. EPC is a multi-access network based on the IP network protocol. It enables access to 3GPP wireless networks such as LTE and 3G, and can even connect to non-3GPP standard WLAN and WiMAX networks. Its main network components include Mobility Management Entity (MME), Serving Gateway (S-GW), Packet Data Network Gateway (PDN GW; P-GW), and Home Subscriber Server (HSS). In E-UTRAN, the base station (E-UTRAN Node B; eNodeB) is responsible for allocating the wireless network resources among User Equipment (UE).

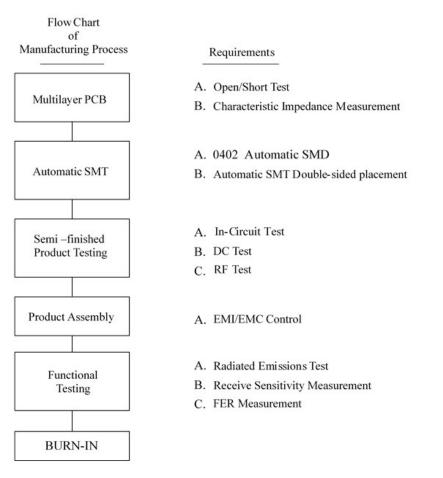

The rapid development of diversified networking such as streaming media, online games, IP VoD, 4K/8K Ultra HD quality and the Internet of Things is giving rise to the incessant demand for bandwidth. Fixed-line technology is still undergoing evolutionary changes. The telephone transmission technology has progressed from VDSL2 to 106MHz and 212MHz G.fast; fiber-optic transmission technology has also evolved from 2.5G GPON to 10G XGS-PON and 40G NG-PON2.

Gemtek provides a whole series of new-generation fixed-line broadband products, including PON, xDSL/G.fast, and DPU, which can all be customized to meet customers' diverse network requirements and develop terminal equipment that render a higher competitive edge in the market.

Smart products have become essential parts of our everyday life. People nowadays are looking beyond the high speed and high coverage of Wi-Fi for more connectivity. Gemtek has been working in the telecommunications field for over 30 years, and had developed numerous products that are in line with technological advances. From 802.11ac to 802.11ax, WiFi networks have become more efficient with its broadened capacity and ability to coordinate multiple access points at the same time. 802.11ax also supports 2.4GHz and 5GHz bands, and can be used in various high density wireless scenarios. Smart devices can be used to manage all sorts of sensors and smart products, allowing enterprise applications and smart homes to be deployed with more flexibility.

Gemtek has also incorporated the latest WiFi technology into its seamless wireless mesh network system to enhance network reliability and allow for multiple connections. The system is capable of automatically detecting and switching between Wi-Fi access points to optimize Wi-Fi signals, working towards the goal of achieving zero attenuation and zero dead ends to build a truly seamless network environment. Last but not least, Gemtek's smart sensors alongside with its controlling systems are designed to automatically screen or monitor the environment, and then help create the best living condition through indoor smart controlling devices. The series of smart sensor and device solutions can also be managed remotely through mobile phones and computers. These solutions can be used for the purpose of security monitoring, access control management, and energy-saving control etc., to allow for a better quality of life.

2.Manufacturing Process

(III) Supply of Raw Materials

The main raw materials of the company's products include integrated circuits, circuit boards, wires, diodes, and capacitors, among which the raw materials that are used to assemble communication chipsets are made by designated manufacturers overseas. Due to the fact that these special components rely mainly on import, which the long wait for supply delivery might affect the overall production lead time, therefore, effective inventory control is vital to get the Company better prepared for unexpected supply outages. Procurement of raw materials from certified domestic suppliers may have less of an issue in terms of supply shortage, though the supply of several passive components can be tight at times, the Company has established contingency plans to mitigate the risks caused by insufficient supplies. As of now, there are no cases where the Company's production plans were hindered or suspended by the lack of raw materials.

(I)Human Resource Data for the Past Two Years

(II)Training and Development

Employees are Gemtek's most valuable asset. Therefore, the proper planning and utilization of all resources to continuously invest in employee training and development is a critical and important task.

According to the Company's employee training and development policies, details and schedules for the training courses are determined by direct needs or essential matters that ought to be addressed as a part of workplace knowledge. Due to the pandemic, physical courses were mostly cancelled or postponed to avoid clustering, resulting in a reduction in training expenses and training hours. In 2022, Gemtek's total number of employee training hours is 14,250.5 hours, which is 14.04 training hours per person. The aggregate amount of training expenses was NT\$401,710(before tax).

Gemtek's training programs are grouped in the following categories:

1. New Employee Training:

Training programs should include new employee orientation, a tour of the workplace environment, brief introduction to the company's products, manufacturing process, systems, information security, and standards of quality, and general courses such as personal development and engagement. Other day to day training would include on-the-job induction training given by team mentors to help the new employee learn and adapt to their roles to quickly achieve a higher level of performace. The goal of all trainings are to help new employees

acclimate to the organization in order to contribute their knowledge and skills with less effort, and be conscientious of rules that are imperative to their rights, health, safety, and their obligations as an employee.

2. Industry and Product Training:

The Company holds a series of industry and product training courses from time to time to keep employees updated with the latest product developments and information that are relevant to the wireless communication technology.

3. Language Training:

Having a higher level of English fluency may help employees engage in better communication with Gemtek's worldwide business partners. The Company holds business English courses from time to time to help employees master the skills that may be beneficial to their job performances.

4. Professional Training:

Include research and development training, quality management training, and business marketing training.

5. Management training:

Training programs are carried out according to the different levels of management. The main idea is to instill insight and leadership skills among managers.

6. Occupational Safety and Health Training:

As mandated by law, the Company has the obligation to educate employees about occupational safety and health as part of the corporate goal to build a safer and healthier work environment.

7. Intellectual Property Training:

A general guide to help R&D employees understand patents and the patent application process.

8. Human Rights Training:

Conduct training programs on labor rights, humane treatment, anti-discrimination, integrity management, business ethics, anti-illicit trade, etc., to implement corporate social responsibility.

In addition to the above-mentioned corporate training programs, each department are granted a budget to allow employees to pursue further studies through external training programs such as seminars, professional and management courses, and so forth. In addition, internal training programs may also encompass broader engagements such as cross-departmental trainings, experience sharing forums, book clubs, etc. The goal is to create a learning atmosphere where employees may have the appropriate sources to learn continuously.

(III) Employee Code of Ethics and Conduct

The Company's work principles are based on code of ethics and professional conduct. Employees should be diligent, prudent, and trustworthy. They have the obligation to contribute their knowledge and capacity to the Company, and abide by

the code of ethics and professional conduct throughout work. The rules that the Company's employees should abide by are as follows:

- 1. Company employees, being part of the Company, are responsible for maintaining the Company's reputation, exhibit camaraderie, be loyal and diligent, and abide by all rules and regulations of the Company.
- 2. Employees should follow the reasonable supervision and guidance of supervisors at all levels and pay attention to work safety. Supervisors at all levels should respect employee's individual identity, show appreciation to subordinates, and provide proper guidance to help employees complete their work.
- 3. Employees should be fully engaged and committed to their work, respect public property, implement cost-saving initiatives, improve operations quality, increase business production, ensure overall effectiveness, and practice professional business conducts in terms of securing trade secrets and confidential information.
- 4. Employees must not exhibit arrogance, laziness, or other toxic behaviors that could harm the reputation of individuals and the Company.
- 5. Employees are not allowed to bring relatives, friends and guests into the factory without approval.
- 6. Employees are not allowed to carry hazardous substances, dangerous goods, prohibited items, flammable (explosive) materials, or things that have nothing to do with workplace duties.
- 7. Employees are not allowed to bring company property off company grounds without prior approval.
- 8. Employees must not make secret profits for themselves by virtue of their positions, and must not violate their duties by accepting improper rebates, gifts, entertainment. or other illegal benefits from others.
- 9. Without the written consent of the Company, employees are not allowed to conduct side businesses that are related to their current work which may impact personal or organizational performances. Nor should employees create a similar business, either individually or through a third party, which may have the potential to compete with the Company.
- 10. The Company name and brand can only be used for business or commercial reasons.
- 11. Maintaining and Protecting Trade Secrets

(1) Employees of the Company shall observe the rules to maintain and protect trade secrets that are relevant to the business.

(2) Employees of the company shall not attempt to obtain or inquire about the trade secrets that are not related to their own business.

(3) Employees of the company shall not share or discuss salaries with co-workers.

(4) If the disclosure of trade secrets should inflict any sort of damage to the Company, the Company shall, in accordance with the law, be entitled to claim compensation to secure and maintain the rights of its mass shareholders and employees.

1. According to laws and regulations, if it is required to apply for a permit for installing anti-pollution facilities, or permit of pollution drainage, or to pay anti-pollution fees, or to organize and set up an exclusively responsible unit/office for environmental issues, the description of the status of such applications, payment or establishment shall be made:

(1) Application status for Permission to Install Anti-Pollution Facilities or Discharge Wastes:

As our Company is situated in the vicinity of the Hsinchu Industrial Park centralized sewage system, regulations require us to channel our wastewater discharge through the local system. Accordingly, we applied for a permit and received approval in official letter Hsingungzhi No. 1075152039, issued on August 31, 2018. The wastewater from Gemtek Technology is now discharged into the sewage system, and undergoes treatment at the Hsinchu Industrial Park Sewage Treatment Plant, where the discharge is tested to ensure it meets government standards before being released.

(2) Payment status for Pollution Control Fees: The Company pays a monthly fee to the Hsinchu Industrial Park Management Center for sewage treatment.

2. Setting forth the company's investment on the major anti-pollution facilities, the use purpose of such facilities and the possible effects to be produced: None

3. Describing the process undertaken by the company on environmental pollution improvement for the most recent 2 fiscal years and up to the prospectus publication date. If there had been any pollution dispute, its handling process shall also be described: None

4. Describing any losses suffered by the company in the most recent 2 fiscal years and up to the prospectus publication date due to environmental pollution incidents (including any compensation paid and any violations of environmental protection laws or regulations found in environmental protection inspection, specifying the disposition dates, disposition reference numbers, the articles of law violated, and the content of the dispositions), and disclosing an estimate of possible expenses that could be incurred currently and in the future and measures being or to be taken. If a reasonable estimate cannot be made, an explanation of the facts of why it cannot be made shall be provided:

On June 21, 2021, our company was issued a NT\$60,000 fine by the Hsinchu County Environmental Protection Bureau in accordance with Article 31, Paragraph 1, Subparagraph 2 of the Waste Disposal Act. The penalty was due to wrongful reporting and measuring of waste. In consequence, the Company has undergone changes in our internal process to eliminate any probabilities of law violation. In the year 2022, no penalty was imposed on our company for any wrongdoing or violation.

5. Explaining the current condition of pollution and the impact of its improvement to the profits, competitive position and capital expenditures of the company, as well as the projected major environment-related capital expenses to be made for the coming 2 fiscal years:

The Company mainly researches, develops, designs, produces, and sells wireless communication products, and is a major player in the electronic high-tech industry. The Company's manufacturing process consists of surface dressing, product testing, product assembly, and product packaging. The Company's main source of gas emissions is the small amount of exhaust gas generated by soldering operations. The Company commissions an accredited environmental inspection agency to perform tests regularly, and files declarations to the Environmental Protection Agency on a quarterly basis in compliance with regulations. Over the years, the amount of gas emissions have met regulatory standards, and no major cases of air pollution have occurred. In terms of waste management, all wastes are entrusted to qualified waste management companies approved by the competent authority, and online declarations are made in accordance with regulations to ensure that there are no environmental pollution issues.

With the rise of environmental awareness, Gemtek has not only actively participated in environmental activities in recent years, but is also obligated to comply with energy-saving regulations during the use of electricity, water, and waste output. In order to achieve the Company's goal in energy conservation and carbon reduction, the Company has installed central air conditioning systems for its offices and factories. The temperature settings of the central air conditioners are adjusted accordingly to provide a comfortable workplace and meet the standards of environmental protection and energy conservation. The Company has replaced its office lighting in various phases. Office lights are scheduled to automatically switch off at night, and guards will inspect the lighting during patrols. In addition, the Company cafeteria serves meals to employees with the use of eco-friendly tableware, and invests in commercial dishwashers to reduce excessive use of water.

V. Labor-Management Relations

Employees are Gemtek's most valuable asset, and the cornerstone of success. Gemtek makes proactive efforts to ensure that each and every one of our colleagues feel appreciated for their time and contributions. In order to enhance and pepetuate this well-balanced organizational atmosphere and culture, Gemtek is fully committed to providing employees with the best workplace environment, while helping our employees achieve higher expectations and standards in life. Respect and care are part of Gemtek's core principles, therefore, Labor-Management Relations has always been harmonious and well-maintained. In the future, we will continue to build even better working environments and create satisfactory benefits for our employees. And through various welfare measures and leisure activities, we hope to provide employees with the opportunities to maintain mental and physical well-being between work and life, as well as strengthen team spirits and group cohesiveness to achieve long-term corporate sustainability.

(I) List any employee benefit plans, continuing education, training, retirement systems, and the status of their implementation.:

| Name | Date of | Letter Granted by |

| Gemtek Technology Co., Ltd. | | No.20324 |
| Supervisory Committee of Business Entities' Labor Retirement Reserve of | October 30, 2000 | 2000Fulaozhizhi |
| Gemtek Technology Co., Ltd. | | No.159743 |

Employee Welfare Committee and Retirement Plan Committee

1.Employee Benefits:

(1) Labor Insurance and National Health Insurance:

The Company offers Labor Insurance and National Health Insurance benefits to Gemtek employees starting from the first day of work.

(2) Group Insurance Plan:

Based on the job grades of individuals, Gemtek employees can receive an additional Group Insurance Plan benefit which the premiums are paid at the Company's expense. Employees are also given the option to purchase Self-insured Plans for family members, providing an extra layer of coverage and care for the their loved ones.

(3) Travel Insurance for Business Trips:

Gemtek employees are entitled to receive a comprehensive, company-paid travel benefit for any accidental death or injury that may occur when going on business trips.

- (4) Staff Cafeteria, Dormitory, Parking Lot.
- (5) Employee Bonus and Compensation Programs.
- (6)Reacreational Ares and Break Rooms:

Gemtek headquarters is equipped with an indoor cafe, aerobics training room, office gym, table tennis room, badminton court, basketball court, etc.

(7)Employee Welfare Committee:

In compliance with relevant regulations, the Company has set up an Employee Welfare Committee to administer employee welfare funds and deploy various welfare measures and events to broaden employee benefits and wellness, which include birthday rewards, travel benefits, holiday bonuses, marriage benefits, maternity and paternity benefits, bereavement benefits, and recreational club activities funding, etc.

2.On October 30th, 2000 (89 FuLaoZhiZhi Letter No. 159743), the Company has officially established a Supervisory Committee of Business Entities' Labor Retirement Reserve in accordance with the provisions of the "Rules Governing Organization of Supervisory Committee of Business Entities' Labor Retirement Reserve" promulgated by the Ministry of the Interior. The Supervisory Committee prepares a retirement reserve based on the approved provisions each year. This retirement reserve is allocated to a special account owned by the Labor Retirement Reserve Supervisory Committee for future pension payments. In addition, in accordance with the Labor Pension Act, for employees who have chosen the new labor retirement plan since July 1, 2005, the company will deposit 6% of the

employee's salary to the employee's personal labor retirement pension account every month, which will be kept under the custody of the Bureau of Labor Insurance. Up to the present, no pension payments have been claimed.

3.In order to enhance the quality of human resources, the Company has formulated employee education and training programs to sustain the company's development goals and support lifelong learning plans for employees. The ultimate goal is to cultivate talents at all levels, keep employees inspired, and improve work efficiency.

4.Health Management:

(1) Hold employee health promotion activities and lectures regularly. Provide high-quality health management services.

(2) Routine on-site healthcare services.

(3) Regular health checks.

(4) A specialized team is set up to protect the Company against the threat of infectious diseases. Team members are in charge of collecting news sources about disease prevention, organizing employee vaccination sessions, and administering infection control kits to colleagues who are required to go on business travels overseas.

(5) Holds workplace safety and health inspections on a regular basis to ensure the quality of the work environment and protect the health and safety of employees.

(6) Gemtek received a Taiwan i Sports enterprise certification award in 2021 for its efforts in providing employees with adequate recreational spaces and equipment, promoting diverse workplace activities, and encouraging health fitness. The Company regularly holds competitive sports events and hires professional trainers for group exercises like aerobics workouts and yoga in order to allow employees to embrace a better work-life quality.

5. Status of labor-management agreements and measures for preserving employees' rights and interests.

(1)Department Meetings: Mainly for addressing issues on communication, allocation of human resources, uncovering problems, in addition to promoting and executing certain matters. The purpose of the meetings is to allow employees to fully understand the Company's standards in production, technology, safety, and quality, as well as create a sense of camaraderie.

(2)Employee Welfare Committee Meeting: Meetings are held quarterly to discuss and inspect matters that center on employee welfare, and also for the purpose of allowing managerial offices to reflect on these particular issues. Reprensentatives of labor and management are to sit together and discuss the policies and measures to improve employee welfare, i.e. understanding employee demands and concerns.

(3)The Company regularly convenes labor-management meetings and has also established an anti-sexual harassment committee. The duty of the ad hoc committee is to address and respond to grievances regarding sexual harassment.

(II) List any losses suffered by the company in the most recent 2 fiscal years and up to the annual report publication date due to labor disputes (including any violations of the Labor Standards Act found in labor inspection, specifying the disposition dates, disposition reference numbers, the articles of law violated, the substance of the legal violations, and the content of the dispositions), and disclosing an estimate of possible expenses that could be incurred currently and in the future and measures being or to be taken. If a reasonable

estimate cannot be made, an explanation of the facts of why it cannot be made shall be provided:

The company has always attached importance to labor-management relations and has made efforts to maintain a harmonious labor-management relationship. There has been no loss due to labor disputes. It is estimated that in the future, under the company's comprehensive employee welfare measures, no labor disputes shall occur.

VI. Cyber Security Management

(I)Cyber Security Risk Management Framework:

In August 2010, our company founded the "Cyber Security Committee," led by the head of the Information Technology Department as the chairman. The committee holds management review meetings every six months to create and evaluate cyber security management objectives and policies, establish business continuity plans for information-related operations, and implement information-related activities in accordance with applicable laws and regulations. The committee is responsible for developing the cyber security management manual and supervising the implementation of the management system, in addition to other related tasks. The content includes:

- 1. The committee reviews and releases the cyber security management manual and regulations by assessing the company's cyber security strategies, operational needs, changes in laws and regulations, cyber a security requirements, technological advancements, and acceptable risk levels,.
- 2.Determine the acceptable level of cyber security risk by assessing the results of the report.
- 3.Negotiate and establish various control measures and processing procedures for cyber security.
- 4. Supervise the introduction process of the cyber security management system.
- 5.Review and improve the current cyber security management system to enhance its operational efficiency and effectiveness.
- 6.Monitor and review the response and improvement measures of significant cyber security incidents.

(II) Cyber Security Policy:

To ensure robust cyber security management and compliance with the ISO 27001 Information Security Management System's requirements for confidentiality, integrity, and availability, 10 Cyber Security Policies have been defined to prevent risks such as destruction, theft, leakage, tampering, abuse, and intentional actions. These policies are intended to maintain the continuous operation of information systems and businesses while meeting applicable legal regulations and the demands of internal and external stakeholders. The policies are duly announced on the company's official website. All personnel are required to be familiar with these policies and comply with relevant cyber security control procedures and regulations.

(III) Types of Controls and Measures:

| Туре | Explanation | Controls and Measures |
|---|--|--|
| User Management | Employee User Accounts, Authorization, and System Operation | Manage and perform regular reviews on employee user account permissions. Manage machine room access controls. Email system two-factor authentication to ensure email security. |
| Access Control | Access to internal and external systems and information by personnel | Audit and management of system access permission. Data access control Record of operational behavior trails |
| Internal and External Threats | Protection measures for system vulnerabilities, antivirus and anti-hacking | 1.Conduct system vulnerability scanning, system updates, and vulnerability remediation periodically. 2.Separate office and production networks. Establish next-generation firewalls (NGFW) for advanced protection based on application Layer 7 systems to prevent virus attacks. 3.Detect and prevent malicious behaviors by using virus detection softwares and updates, and introduce Managed Detection and Response (MDR) outsourced services. 4.Strengthen email security, including spam blocking and email virus detection. 5.Conduct network risk assessments through a third-party threat detection service, SecurityScorecard The company has maintained a level A rating throughout the year |
| System Availability | Measures for handling system availability and service interruption | Monitor system and network availability. The uninterrupted power supply system in the data center was updated this year to a rack-mounted modular UPS system to provide higher scalability and continuous power for 90 minutes minimum. Introduce new backup software and hardware to strengthen off-site data backup and enhance control for potential destruction. Perform disaster recovery drills and restoration exercises periodically. A total of 19 drills and exercises were conducted this year. |
| Cyber Security Training and Campaigns | Strengthen employees' awareness and concepts of information security | 1. There were a total of 18 cyber security awareness campaigns, including topics such as prevention engineering for email and social media, prevention of business email scams, and compliance with intellectual property rights. 2. Cyber security education and training: Different levels of training rollouts were offered to general employees and IT professionals. A total of 13 |

| Туре | Explanation | Controls and Measures |
|------|-------------|--|
| | | sessions and 902 hours were provided. 3.To enhance phishing email awareness, social engineering drills were conducted, and further education and training were provided for personnel who violated policies. |

(IV) ISO 27001:2022 Certification for Cyber Security Management System:

Gemtek obtained ISO 27001 certification in August 2010 as part of its cyber security control measures to meet the requirements of cyber security management plans, international cyber security management systems, and to satisfy the cyber security demands of stakeholders. The certificate is valid from August 2022 to August 2025. This implementation has not only enhanced our cyber security management and operational capabilities but has also safeguarded the security of assets belonging to both our company and customers.

(V)Cyber Security Breach and Incidents :

List any losses suffered by the company in the most recent fiscal year and up to the annual report publication date due to significant cyber security incidents, the possible impacts therefrom, and measures being or to be taken. If a reasonable estimate cannot be made, an explanation of the facts of why it cannot be made shall be provided: None

II. Five Year Financial Analysis

(I) Financial Analysis (Consolidated) of Gemtek and its Subsidiaries - Based onn IFRS

Changes in financial ratios over the past 2 fiscal years (Analysis is not required for changes less than 20%):

1.Due to the increase in interest expenses from borrowed funds in 2022, the times interest earned decreased by 68.54% compared with that in 2021.

2. Due to the increase in net cash inflow from operating activities in 2022, the cash flow ratio, Cash Flow adequacy ratio, and Cash Flow Reinvestment Ratio increased by 219.27%, 676.89%, and 124.23%, respectively, compared with that in 2021.

Data source: Financial reports verified or reviewed by the CPA.

Note 1: For the years 2017 to 2022, the Company has adhered to the IFRS standards The above financial information had been audited by the CPA.

Note 2: The following formulas are applied when calculating the financial ratios.

- 1. Financial structure
 - (1) Debt ratio = Total liabilities / Total assets
 - (2) Ratio of long-term funds to property, plant, and equipment = (Total equity + Non-current liabilities) / Net property, plant, and equipment
- 2. Debt service ability
 - (1) Current ratio = Current assets / Current liabilities
 - (2) Quick ratio = (Current assets Inventory Prepaid expenses) / Current liabilities
 - (3) Times interest earned ratio = Earnings before interest and taxes / Interest expenses
- 3. Operating ability
 - Accounts receivable turnover rate (including accounts receivable and bills receivable from business activities) = Net sales / Balance of average accounts receivable in each period (including accounts receivable and bills receivable from business activities)
 - (2) Average days for cash receipts = 365 / Accounts receivable turnover
 - (3) Inventory turnover rate= Cost of sales / Average inventory
 - (4) Payables turnover rate (including accounts payable and bills payable from business activities) = Cost of sales / Balance of average accounts payable in each period (including accounts payable and bills payable from business activities)
 - (5) Average days for sale of goods = 365 / Inventory turnover
 - (6) Turnover rate for property, plant and equipment = Net sales / Average net property, plant, and equipment
 - (7) Total asset turnover rate = Net sales/Average total assets

4. Profitability

- (1) Asset return ratio = [Profit or loss after tax + Interest expenses × (1 Tax rate)] / Average total assets
- (2) Equity return ratio = Profit or loss after tax / Average total equity
- (3) Net profit ratio = Profit or loss after tax / Net sales
- (4) Earnings per share = (Income attributable to owners of parent company Preferred shares dividends) / Weighted average number of shares issued
- 5. Cash flow
 - (1) Cash flow ratio = Net cash flows from operating activities / Current liabilities
 - (2) Cash flow sufficiency ratio = Net cash flow from operating activities for the most recent five years / (Capital expenditures + Inventory increment + Cash dividends) for the most recent five years
 - (3) Cash reinvestment ratio = (Net cash flow from operating activities Cash dividends) / (Gross property, plant, and equipment + Long-term investment + Other non-current assets + Working capital)
- 6. Leverage
 - (1) Operating leverage = (Net operating revenue Variable operating costs and expenses) / Operating income
 - (2) Financial leverage = Operating income / (Operating income Interest expenses)

Note 3: When the above formula for calculation of earnings per share is used during measurement, give special attention to the following matters:

- 1. Measurement should be based on the weighted average nymber of common shares, not the number of issues shares ar year end.
- 2. In any case where there is a cash capital increase of treasury stock transaction, the period of time in circulation shall be considered in calculating the weighted average number of shares.

- 3. In the case of capital increase out of earnings or capital surplus, the calculation of earnings per share for the past fiscal year and the fiscal half-year shall be retrospectively adjusted based on the capital increase ratio, without the need to consider the issuance period for the capital increase.
- 4. If the preferred shres are non-converitble cumulative preferred shares, the dividend of the current year (whether issued of not) shall be subtracted from the net profit after tax, or added tp the net loss after tax. In the case of non-cumulative preferred shares, if there is net profit after tax, dividend on preferred shares shall be subtracted from the net profit after tax; if there is loss, then no adjustment need to be made.

Note 4. Give special attention to the following matters when carrying out cash flow analysis:

- 1. Net cash flow from operating activities means net cash in-flows from operating activities listed in the statement of cash flows.
- 2. Capital expenditures means the amounts of cash out-flows for annual capital investment.
- 3. Inventory increase will only be entered when the ending balance is larger than the beginning balance. An inventory decrease at year end will be deemed zero for calculation.
- 4. Cash dividend includes cash dividends from both common shares and preferred shares.
- 5. Gross property, plant and equipment means the total value of property, plant and equipment prior to the subtraction of accumulated depreciation.

Note 5: Issuers shall separate operating costs and operating expenses by their nature into fixed and variable categories. When estimations or subjective judegments are involved, give special attention to their reasonableness and to maintain consistency.

Note 6: In the case of a company whose shares have no par value or have a par value other than NT\$10, for the calculation of the above-mentioned paid-in capital ratio, the ratio of equity attributable to owners of the parent as stated in the balance sheet shall be substituted.

| | Year | | | | | |

I. FINANCIAL POSITION ANALYSIS (CONSOLIDATED) - IFRS

Unit: NT\$, All in thousands

1. Analysis of deviation and impact: (Amount deviation over 20% and above NT\$10 million)

(1)The increase in current assets was mainly attributed to increase in net accounts receivable.

(2)The increase in other assets is mainly attributed to increase in right-of-use asset.

(3)The increase in total assets is mainly attributed to increase in current assets.

(4)The increase in current liabilities is mainly attributed to increase in short-term loan and accounts payable.

(5)The increase in total liabilities is mainly attributed to increase in short-term loan and account payable.

(6)The increase in other equity was mainly attributed to the increase in unrealized gains and losses on financial assets measured at fair value through other comprehensive gains and losses

(7)The increase in non-controlling interests was mainly attributed to increase in current net profit of non-controlling interests.

2.Countermeasures: None. The above changes have no significant impact on our company.

II.FINANCIAL PERFORMANCE (I)Financial Performance Analysis

Unit: NTD, All in thousands

| Year | 2022 | 2021 | Difference | (%) |
|-----------------------------------|------------|------------|-------------|---------|
| Net operating income | 27,899,990 | 22,912,691 | 4,987,299 | 21.77 |
| Operating cost | 25,034,716 | 20,852,099 | 4,182,617 | 20.06 |
| Gross profit | 2,865,274 | 2,060,592 | 804,682 | 39.05 |
| Operating expenses | 2,136,917 | 1,704,499 | 432,418 | 25.37 |
| Operating profit | 728,357 | 356,093 | 372,264 | 104.54 |
| Non-operating income and expenses | 190,976 | 367,360 | (176,384) | (48.01) |
| Income before taxation | 919,333 | 723,453 | 195,880 | 27.08 |
| Income tax expense | 173,283 | 41,869 | 131,414 | 313.87 |

| Other comprehensive loss | 610,824 | 1,968,169 | (1,357,345) | (68.96) |
| Total comprehensive income | 1,356,874 | 2,649,753 | (1,292,879) | (48.79) |

1. Analysis of deviation and impact: (Amount deviation over 20% and above NT\$10 million)

(1)Increase in net operating income was mainly attributed to the increase in 2022 operating income and the inclusion of increased shareholding and control in Browan Communications on December 27, 2021 in our consolidated financial statements for the year 2022.

(2)Increase in operating cost was mainly attributed to the increase in operating profit and the inclusion of acquisition of Browan Communications in our consolidated financial statements.

(3)Increase in gross profit was mainly attributed to the increase in the sale of high-priced fiber optic network equipment to new customers in the year 2022 and the inclusion of Browan Communications in December 2021 in our consolidated financial statements.

(4)Increase in operating expenses was mainly attributed to the inclusion of Browan Communications in our consolidated financial statements, increase in number of employees, salary adjustment, increase in bonuses, increase in R&D programs, and increase in product promotion due to the easing of COVID restrictions.

(5)Increase in operating profit was mainly attributed to the increase in sales gross profit.

(6)Decrease in non-operating income was mainly attributed to the inclusion of Browan

Communications in December 2021 in our consolidated financial statements. According to the provisions of IFRS 3, because our company held shares in Browan Communications prior to its acquisition, we were required to re-measure the previously held equity of the acquiree at fair value as of the acquisition date. This resulted in a disposal of interests of Browan Communications, the associated company.

(7)Increase in income tax expenses was mainly attributed to the increase in 2022 income tax and increase in Profit-seeking Enterprise Income Tax for undistributed earnings.

(8)Decrease in other comprehensive gains and losses was mainly attributed to the decrease in unrealized gains and losses on financial assets measured at fair value through other comprehensive gains and losses.

(9)Decrease in comprehensive income for the current year was mainly attributed to the decrease in unrealized gains and losses on financial assets measured at fair value through other comprehensive gains and losses.

2.Countermeasures: None. The above changes have no significant impact on our company.

(II)Gross Profit Variance Analysis:

Unit: NTD, All in thousands

Note: P'Q': Current year's price and quantity ; P Q: Prior year's price and quantity

1.Wireless Gateway

For the year 2022, due to the easing of the COVID-19 pandemic, there has been a significant decrease in demand for laptops and desktops with wireless network card terminals, resulting in the Company's sales volume for Wireless Gateway decreased with an unfavorable sales revenue variance of NT\$1,020,418 thousand. In terms of price, due to the fact that a significant portion of wireless network card production was moved back to Taiwan from Mainland China, which led to a relative increase in sales prices, therefore resulting in a favorable sales revenue variance of NT\$311,948 thousand. As for cost of goods sold, due to the decrease in sales volume, a favorable cost-volume variance was NT\$862,365 thousand; and due to the decrease in volume, the decrease in economies of scale plus higher labor costs in Taiwan resulted in an unfavorable price variance of NT\$85,266 thousand. For sales mix, the decrease in sales volume has led to a decrease in production volume, resulting in an unfavorable sales revenue mix variance of NT\$116,795 thousand and a favorable sales cost mix variance of NT\$31,924 thousand. To summarize the above, the gross profit from sales of wireless gateway in 2022 compared with that in 2021 decreased by NT\$16,242 thousand.

2. Wireless Network Card

As the demand for existing wireless gateway equipment was fulfilled in 2021, the sales volume in 2022 decreased, resulting in unfavorable sales revenue variance of NT\$423,234 thousand. Nevertheless, due to stable growth in the North American network communication market, coupled with an increase in purchases of high-priced fiber optic network equipment by major customers, resulted in a favorable price sales revenue variance of NT\$5,403,445 thousand. As for cost of goods sold, due to the decrease in sales volume, which led to a decrease in production, therefore resulting in a favorable cost variance of NT\$396,809 thousand. On the other hand, due to the fact that high-priced fiber optic network equipment requires high-quality materials and technology, therefore resulting in an unfavorable cost variance of NT\$4,550,1229 thousand. For sales mix, the decrease in sales volume and increase in sales price in addition to the decrease in production volume and increase in cost resulted in an unfavorable sales revenue mix variance of NT\$125,600 thousand and a favorable sales cost mix variance of NT\$105,765 thousand. To summarize the above, the gross profit from sales of Wireless Network Card in 2022 compared with that in 2021 decreased by NT\$807,063 thousand.

3.Wireless Modules

For the year 2022, due to decrease in contract manufacturing for AMPAK Technology, resulting in unfavorable sales revenue variance of NT\$47,159 thousand. In addition, due to partial increase in price due to the increase in cost, resulting in favorable sales revenue variance of NT\$46,404 thousand. As for cost of goods sold, due to the decrease in sales volume, resulting in a favorable cost variance of NT\$46,404 thousand. However, due to the cost variance in raw material and human labor, resulting in an unfavorable cost variance of NT\$43,079 thousand. For sales mix, the decrease in sales volume and increase in sales price resulted in an unfavorable sales revenue mix variance of NT\$11,515 thousand; and the decrease in sales volume and increase in cost of raw materials resulted in a favorable sales cost mix variance of NT\$9,460 thousand. To summarize the above, the gross profit from sales of Wireless Modules in 2022 compared with that in 2021 increased by NT\$6,551 thousand.

III.CASH FLOW

1.Cash Flow Analysis

| Items | 2022 | 2021 | (%) | | | |
|---|------|------|-----|--|--|--|
| Cash flow ratio 956,420 (572,906) 260 | | | | | | |
| Cash flow adequacy ratio (662,691) (167,976) (294. | | | | | | |
| Cash flow reinvestment ratio (704,106) 308,623 (328.14) | | | | | | |
| Explanation of Deviation: <u>Operating Activities</u>: Due to increase in net cash inflow from operating activites, and decrease in accounts payable paind in cash for 2022. <u>Investment Activities</u>: Due to the increase in Property, plant and equipment in 2022. <u>Financing Activities</u>: Due to decrease in bank loans and purchase of treasury stocks in 2022. | | | | | | |

Analysis of Deviation:

(1) Cash Flow Ratio increased as compared to 2020 due to operating activities net cash outflow of 2021 is relatively less than 2020.

(2) Cash Adequacy Ratio decreased by 94.8% as compared to 2020 due to decrease in operating cash flow over the past 5 years.

2.Remedial Actions for Liquidity Shortfall: As a result of positive operating cash flows and cash on-hand, remedial actions are not required.

3.Cash Flow Projection for Next Year:

| | | | | | $D, \pi m m m$ | lousanu |
|--------------|----------------------|------------|----------------|--------------|----------------|-------------|
| | | Cash Flow | Cash Flow from | | Remedie | es for Cash |
| Beginning | Cash Flow from | from | financing | Cash Surplus | De | eficit |
| Cash Balance | operating activities | investment | activities | (Deficit) | Investment | Financing |
| | | activities | | | Plans | Plans |
| 1,009,501 | 231,201 | (135,427) | 1,235,413 | 2,340,688 | N/A | N/A |

Unit: NTD All in Thousand

Analysis of Cash Flow:

(1)Operating Activities: Increase in cash flow due to projection of continued growth in revenue and improved control over costs and expenses.

(2)Investment Activities: Due to the increase in Property, plant and equipment.

(3)Financing Activities: Due to distribution of share dividends, repay bank loans, and conversion of the 6th domestic unsecured convertible bonds.

IV.Impact of major capital expenditures on the Company's financial operations for the most recent fiscal year: As of the date of this annual report's publication, there are no major capital expenditures.

V. REINVESTMENT POLICIES, MAIN REASONS FOR PROFITS/LOSSES GENERATED, IMPROVEMENT PLANS, AND INVESTMENT PLANS FOR THE COMING YEAR:

1.Reinvestment Policy:

Gemtek primarily focuses on reinvesting in the wireless network communication industry and follows a conservative, long-term investment strategy. In compliance with the "Regulations Governing the Acquisition and Disposal of Assets by Public Companies" set by regulatory authorities, the company has established a "Procedure for Handling the Acquisition and Disposal of Assets" to guide our reinvestment decisions and provide transparency in relevant business and financial conditions. To ensure effective supervision and management of our reinvestment companies, Gemtek has also created a subsidiary management policy as part of our internal control system. This policy sets standards for information disclosure, financial management, business operations, inventory management, and financial control. Periodic audits are conducted to establish risk management mechanisms that maximize the value of our reinvestment business.

2.Reinvestment Analysis for Current Year- Main reasons for Profit/Loss, Improvement Plans, and Future Investment Plans

| | | | , | |
|--|---------------------|--|------------------------------|------------|
| | Profit/Loss for the | Main Reasons for | | Future |
| Investee | Current Year | Profit/Loss | Improvement Plans | Investment |

| Browan Communications Incorporation | 55,052 | Production hasn't met projected profit. | - | - |
| Gemtek Vietnam Co., Ltd. | 316,125 | Recognition of profit gain in reinvestment. | - | - |
| Antek Networks Inc. | (1,566) | Restructuring cloud technologies into online educational services. The revenue generated from the sale of applications and features is insufficient to cover operational expenses. | - | - |

Unit: NTD/US, All in thousands

3.Future Investment Plans: None for the upcoming year.

VI.Organizational Risk Management

L

Risk Management Framework

Over the years, Gemtek has continued to strengthen its corporate risk management framework by adopting internal control practices that involve risk detection, evaluation, reporting, and handling. The Internal Control System developed by Gemtek is implemented on two levels. Corporate divisions and members form the Primary Level, which is the first line of defense, is to identify underlying risks, and to assess and manage ongoing risk mitigation policies. The Advanced Level consists of individuals from the upper level of the management hierarchy (i.e. Deputy General Manager and above) who are in charge of evaluating the feasibility of business and its risk factors, while final decisions are subject to the consideration of the chairman of the board.

Despite having comprehensive risk control measures in place, the Company has not established a permanent risk management division to overlook relevant matters. The plan is for all employees to be aware of risks and escalate matters at all times to prevent any avoidable events. In cases of emergencies, the Company shall activate its Business Continuity Management Plan to support business operations. The Company's risk management framework is as illustrated in the following chart.

| Evaluation of Risk Factors | Direct Risk Management | Risk Assessment and Control |
|---------------------------------------|---------------------------|-------------------------------|
| | (Divisions) | (Advanced Level) |
| | (Primary Level) | , , , |

Risk Management Framework

Risk Management and Assessment:

(I) Impacts of interest and foreign exchange rate fluctuations and inflation on the Company's profit and loss, and countermeasures:

(1)Interest Rate

In 2022, the company's financial expenses, including interest expenses on bank loans and amortization of interest expenses on convertible bonds, amounted to NT\$82,357 thousands. The company's financial status is sound. The company's financial division closely monitors interest rate trends and maintains close communication with banks to obtain favorable borrowing rates. The company also adjusts its funding sources by adopting various financing methods in the capital market to avoid any significant negative impact on its profit and loss caused by interest rate fluctuation.

(2) Foreign Exchange Rate Fluctuations and Inflation

The company has foreign currency positions arising from exports and overseas purchases, with receivables and payables primarily denominated and settled in US dollars as a means to hedge exchange rate fluctuations. In 2022, the company recorded a foreign exchange gain (loss) of NT\$67,418 thousand. To mitigate the risks associated with foreign currency positions, the company's financial division continuously monitors foreign exchange market trends and seek advice from foreign exchange banks. In order to mitigate exposures to exchange rate fluctuations and inflation, the company uses currency swaps to hedge currency risks. If the remaining foreign currency positions are higher than expected, the cash will be sold by spot transaction.

(3)Inflation

Throughout the 2022 fiscal year and as of the printing date of this Annual Report, the company has not experienced any adverse effects on its operations due to inflation. The company has always maintained good relationships with its suppliers and will continue to strive to reduce costs in the future, while closely monitoring changes in raw material prices and taking appropriate measures in a timely manner.

(II) Policies for high-risk, high-leverage investments, capital lending, endorsements, guarantees, and derivatives transaction, main reasons for the profits or losses generated thereby, and countermeasures:

The company and its subsidiaries have always focused on their main business operations and have not ventured into other high-risk industries. The financial policy is based on a conservative approach, and there is no involvement in high-risk and high-leverage investments or transactions. Therefore, the associated risks should be limited.

The company follows its policies and measures in accordance with its "Procedures for Acquisition and Disposal of Assets," "Procedures for Loaning of Funds," " Procedures for Endorsement / Guarantees," and "Guidelines for Monitoring and Managing Subsidiaries" for loaning of funds, endorsements, guarantees, and derivative transactions with others. All the above-mentioned endorsements, guarantees, and financing with others are handled in accordance with the relevant operating procedures, and overall, have no significant impact on the consolidated profit and loss. Furthermore, company and its subsidiaries have always focused on their main business operations and have not ventured into other high-risk industries. The financial policy is based on a conservative approach, and there is no involvement in high-risk and high-leverage investments or transactions. Therefore, the associated risks should be limited.

- (III) Research and development (R&D) projects and estimated R&D expenditures:
 - Self-research and self-developed technologies are the backbones of our products. To support this, we invested NT\$916,227 thousand in research and development during the fiscal year 2022. Moving forward, our research and development efforts will focus on integrating various technologies and equipment for our products. We will also collaborate with domestic enterprises to achieve these goals. By leveraging the latest wireless communication technologies, including 5G and Wi-Fi next-generation standards, we aim to stay ahead of market trends and develop niche products with high profitability and growth potential. Our ultimate goal is to maximize profits in the long run.
- (IV)Impacts of changes in domestic and foreign government policies and laws on the Company's financial operations, and future countermeasures:

The U.S.-China Trade War and the emergence of Covid-19 pandemic have driven up the demand for manufacturing capacities outside China and growth in global networking equipment, forcing Europe and the United States to actively seek alternative production in countries like Taiwan and Vietnam. Being ahead of the game, in 2018, the Company had built a branch factory located in Vietnam, which the production capacity is currently fully booked, and therefore, in order to meet heavy demands, the Company plans on purchasing a new plot of land in Vietnam to build a second manufacturing base. The new plant is expected to mitigate the impact of tariffs caused by the U.S.-China Trade War, and to reshape the Company's globalization strategies as well.

(V) Impacts of industry and technology changes to the Company's financial operations, and future countermeasures:

As a sector of the high-tech industry, the rapid growth of the telecommunication industry has accelerated the innovative development and advancement of numerous wireless network communications products. Based upon this economic atmosphere, the Company should strive to keep up with the technology trends to continue to grow and expand its business. For decades, the Company's operations were mainly focused on the research and development of wireless network communications equipment. The Company has been a leader in the field propelled by a group of dedicated professionals, backed by cutting edge manufacturing equipment and technology. The Company is now working towards a more diversified R&D approach, and has continued to innovate over the years. Technological evolution will contribute to the development of the Company's business. However, successful business expansion must also be accompanied by a good management and cost control system, as well as a strong financial backbone to allow the Company to grow at a steady pace. Therefore, the Company has to strengthen its internal controls on all aspects to maintain business efficiency.

Information security is an important item of operational risk. In order to reduce the probability of information security accidents and manage the risks caused by

accidents, ensure the normal operation of the company's business, comply with the specific information security management plan, and meet the information security needs of stakeholders, this document The company has introduced ISO 27001 certification in August 2010 and obtained the certificate. The current certificate is valid from August 2022 to August 2014. Through the introduction of this information security management system, it can effectively strengthen information security management and execution capabilities, and protect The assets of the company and its customers are safe. In response to external changes and ever-changing attack methods, the company has implemented and continuously updated rigorous information security measures, using various information security mechanisms and system architecture designs to block the constantly evolving information security threats. Preventive measures include establishing appropriate security control mechanisms for the use of computers, regulated information equipment and network resources; in order to prevent and reduce the damage caused by malware attacks, the company has established relevant strengthening mechanisms and systems, such as: requirements Install anti-virus software on computers and devices, strengthen firewalls and network controls to prevent the spread of computer viruses across regions, establish endpoint anti-virus and anti-hacking measures, introduce advanced solutions to detect and deal with malicious software, and regularly entrust external experts to perform information execution An evaluation, etc. Even if Zhengwen has established comprehensive network and computer-related security protection measures, there is still no guarantee that the company will not be affected by information security risk threats and hacker attacks. In response to the occurrence of information security incidents, Zhengwen has established information security incident reporting and handling procedures. If an information security incident unfortunately occurs, it can be handled promptly to effectively block new types of information security threats and reduce the impact or impact on operations.

(VI) Impacts of changes in corporate image on the company's crisis management and future countermeasures:

The Company is dedicated to the development and manufacturing of wireless network products and has always upheld a good reputation throughout its years of doing business. The Company has no negative publicity and therefore the corporate image has never been affected.

(VII) Expected benefits and potential risks related to mergers and acquisitions:

The Company has no plans for mergers and acquisitions as of the publication of this report. However, if the Company does have plans in the future, it will take proactive measures to assess whether the merger can bring synergies to the company as well as guarantee the rights and interests of shareholders.

(VIII) Expected benefits and potential risks of capacity expansion:

Our company's second manufacturing base located in Vietnam was completed in the third quarter of fiscal year 2022 and commenced production near the end of the year. Going forward, we plan to gradually install sufficient equipment and machinery to support production capacity based on order status. Currently, our Vietnam factory has 11 SMT production lines, which we expect to replace 70% of the production capacity of our Mainland Chinese factories. We also plan to add three additional SMT production lines in Vietnam this year, and equipment installation is currently underway. Nevertheless, business expansion requires a well-coordinated management system to allow for steady growth. In other words, if the Company

allows business to expand too rapidly, all aspects of management may have trouble keeping pace, resulting in irreversible damages to the Company. Therefore, aside from working towards the goal to increase manufacturing capacity, the Company must also know how resources can be efficiently allocated in terms of internal control and financial funding.

(IX) Risk of procurement and sales concentration, and future countermeasures:

(1)Purchases:

The Company is a supplier of wireless network equipment and products, therefore, it is relatively important to maintain a close relationship with upstream and downstream manufacturers throughout the supply chain. And due to the fact that wireless network product specifications need to be certified in particular, in the process of strategic sourcing, the Company's main approach is to partner with the selected few who are capable of developing the necessary chip modules firsthand. The Company is well aware that the approach would result in procurement concentration in which supply disruption may be a lurking issue, therefore, inventory management and advanced preparation of supplies and raw materials are the key measures to avoid such risks. As of the date of printing this report, our company has not experienced any shortages or disruptions in the supply of goods due to procurement concentration.

(2)Sales:

The Company's major clients at present are retail distributors located in the United States and Europe on account of the region's soaring demand for wireless communication products. In addition, the need for embedded modules found in products such as laptop computers is equally on the rise, resulting in the increase of the Company's worldwide OEM sales volume over the years. In order to prevent sales concentration in the market, the Company plans to take proactive measures in building new marketing channels by strengthening cooperation with manufacturers located across Japan and Asia.

- (X) Impacts and risks arising from major transfer or replacement of shares by Directors, Supervisors, or shareholders with over 10% of shares in the Company: None
- (XI) Impact of change in Company management and associated risks:
 - There have been no changes in the ownership of our company as of fiscal year 2022 and up to the date of printing this report. Our management team is dedicated to upholding sound business principles and good management practices, with the goal of achieving operational growth and profitability to increase shareholder value.
- (XII) Litigious or non-litigious matters:
 - (1) The major litigious, non-litigious or administrative disputes that have been concluded by means of a final and definitive judgment, or are still under litigation, where such a dispute could materially affect shareholders' equity or the prices of the company's securities, the facts of the dispute, amount of money at stake in the dispute, the date of litigation commencement, the main parties to the dispute, and the status of the dispute as of the date of printing of this annual report shall be disclosed:

Chang Hwa Bank Ltd. (hereinafter referred to as the Chang Hwa Bank) has an outstanding debt claim against Foho Technology Corp (hereinafter referred to as Foho) awaiting settlement. Consequently, the Chang Hwa Bank filed for a provisional attachment order at the Taiwan New Taipei District Court (hereinafter referred to as New Taipei Court) to acquire the obligatory right of Foho 's accounts receivable from Gemtek, and as a result, based on this particular authorization, an attachment order was issued to Gemtek by the Taiwan Hsinchu District Court (hereinafter referred to as Hsinchu Court). After determining that the amount owed to the Bank was USD31,502.94, the order was thereby executed accordingly. However, coincidentally, Hua Nan Commercial Bank Ltd. (hereinafter referred to as Hua Nan Bank) also has an outstanding debt claim against Foho Technology Corp. We believe that our part of the claim should be offset by the USD31,502.94 transferred by Gemtek to Foho's Hua Nan Bank account on the same day, and Gemtek should have no further liabilities tied to Foho's accounts payable henceforth. Nevertheless, Chang Hwa Bank proceeded to sue Gemtek for violating the attachment order, claiming that Foho's outstanding debt claim of USD31,502.94 against our company still stands despite our company's apparent efforts to settle the debt. On January 6, 2023, the Hsinchu Court ruled against our company in the first instance, which was considered final because our company did not file an appeal. Given the circumstances, Gemtek still strongly believes that the USD31,502.94 initially wired to Hua Nan Bank should be sufficient to serve as our right to offset the debt claim with Foho in the first place. However, the crux of the matter was that Hua Nan Bank took advantage of its position and declared itself the first-priority creditor, forcefully prioritizing its repayment and infringing upon the rights of other creditors. Therefore, in conclusion, Hua Nan Bank should be held liable for the matter and reimburse our losses in return. Gemtek has already sent a letter to Hua Nan Bank on March 30, 2023, to address the issue and request a response. Yet, as the amount involved was not significant, the outcome of the trial did not pose a material impact on our finances or operations.

(2) The major litigious, non-litigious or administrative disputes that have been concluded by means of a final and definitive judgment, or are still under litigation that involves any director, any supervisor, the general manager, any person with actual responsibility of the Company, any major shareholder holding a stake greater than 10 %, and/or any company or companies controlled by Gemtek, and the status of the dispute as of the date of printing of this annual report shall be disclosed: Mr. Wang Zhu-san, one of our independent directors, is involved in a property

Mr. Wang Zhu-san, one of our independent directors, is involved in a property dispute with Mr. Chen and 8 other individuals. As this is a personal affair of Mr. Wang Zhu-san, therefore the outcome of the trial should not pose any material impact on our company's finances, operations, shareholder rights, or securities prices.

(3) The occurrence of any event set forth under Article 157 of the Securities and Exchange Act that involves a company director, supervisor, its general manager, or any major shareholder with a stake of more than 10 percent, provided the event occurred in the most recent 2 fiscal years or during the current fiscal year, and the status of the event as of the date of printing of this annual report shall be disclosed: None

(XIII) Other material risks and countermeasures:

(1) Macroeconomic deterioration may reduce the Company's profits. In recent years, the Company has experienced extremely high growth rates due to the rapid development of the wireless communications industry. However, in the event of economic reversal fueled by macroeconomic instability, consumer's willingness to pay and global demands may possibly decline, which would cause direct impact to the wireless communications market and the company's profitability.

(2) Consumer acceptance and use of new technology may not be as high as expected Wireless communications is an emerging technology. The Company is a highly-dedicated wireless communications system manufacturer that focuses on the fundamental research and development of the technology as well as the creation of multiple trending products and components in the market. Nevertheless, if consumer acceptance and use of new technology does not turn out as high as expected, the market direction will bring adverse impacts to the Company's future business performances.

(3) Price wars will affect the Company's profit.

Competition among wireless communications system manufacturers has been intense over the past years. Business competitors have been cutting prices and finding ways to scale down profit margins in order to win clients. If the price war persists, low margins will cause a long-term impact on the Company's ability to profit.

(4) Downstream market size is relevant to the Company's sales outcome. Embedded modules for laptop computers has contributed a fair share to the Company's sales revenue in recent years aside from conventional wireless network cards and routers sold to existing customer base. If demands for laptop computers should drop dramatically, the ensuing effects would not be optimistic for the Company.

(5) The Company adheres to its steady operation philosophy and has been able to maintain a high level of business growth in the past three years. Nevertheless, in truth, one cannot use the Company's past operating performances to earn a guaranteed profit from investing in the Company's stock as the market price is constantly fluctuating under the influence of systematic risk-factors. Economic cycles and price volatility may result in unfavorable outcomes for investors.
(6) The Company needs to draw an effective talent management strategy.

Talented people are the foundation of the Company's innovative drive, allowing the Company to constantly develop, operate, and maintain competitiveness in the industry. The Company must continue to improve and enhance its employee welfare and work environment as a means to retain and attract talents, keeping the source of innovative capacity abundant and secure.

(7) Natural disasters and severe infectious diseases may cause adverse impacts on the Company's operations

Taiwan has experienced large-scale earthquakes and severe hurricanes as well as mass infectious diseases in the past. Both natural disasters and epidemics have caused great damage to Taiwan's overall economic environment. The recurrence of such events will bring negative impacts to the Company's operations.

(8) Intellectual property disputes

R&D capabilities and manufacturing abilities are the core of the Company's operations. Therefore, protecting intellectual property rights is extremely vital to the Company. Patents applications are filed immediately once the Company finds the results of a R&D project suitable for protection. As the number of the Company's

patents continue to increase, potential disputes over intellectual property rights with companies who have similar endeavors in the industry may begin to emerge. Litigation may have a negative effect on the Company's bottom line.

(9) Business risks in China

The Company's manufacturing policies in recent years focuses on the development of more diversified, high value-added products made in limited quantities in Taiwan. Low-margin products are now mostly manufactured in the Mainland. In view of the unstable cross-strait relations, any deterioration of the status quo will inevitably cause an adverse effect on the Company's operations.
