

Gemtek SHOWCASE AT 2019 MWC

Dear Valued Customers and Partners,

One of the world's biggest IT event, MWC 2019 Barcelona, is just around the corner. We are excited to announce that Gemtek will be participating at the Mobile World Congress 2019 in Barcelona from Feb.25 to Feb.28. We cordially welcome you to visit our booth at Hall 5 – 5I26.

In this event, we will be showcasing a wide range of new products and technologies, Some highlights to look forward to include:

5G/mmWave Devices

Our latest 5G technology devices that support FWA deployment and applications.

LTE Indoor/Outdoor/IoT Devices

Complete LTE portfolio, ranging from entry Cat 4 to advance Giga LTE, plus various cellular IoT applications.

100G SDN Switch

Allows telecom operators to deploy access network with built-in IEEE1588v2 PTP that provides precise and accurate timing information.

Wi-Fi 6

A technology that is in line with the latest Wi-Fi standard, providing faster high-capacity connection, coverage, and performance features that are based on user requirements.

Easy Mesh

New Mesh Wi-Fi standard, provides users with fast setup and whole-home coverage experience.

Wi-Fi Sensing

The advanced wireless technology that facilitates accurate indoor positioning, tracking, and monitoring.

Gemtek has endeavored in instilling cutting-edge technologies, advanced integration abilities and strong market sense into the making of our wireless network communications products. We believe our products will suit your requirements when you expand your business opportunities.

Do not miss the chance to see us at MWC 2019. We look forward to meeting you at Barcelona!

CEO
